## Infotypes for Evaluating Payroll Results

### Use

In addition to master data, applicant data and personnel planning data, you can also evaluate payroll results using a query and ad-hoc query.

A number of predefined infotypes are available for the evaluation. The wage types required for the evaluation are entered in these infotypes:

Infotype	Meaning
0402	Payroll results Period values
0403	Payroll results Period values (not required at present)
0458	Monthly cumulation of payroll results
0459	Quarterly cumulation of payroll results
0460	Annual cumulation of payroll results

**You can either activate this pre-defined infotype or create your own infotypes using the same structures. You can supplement these infotypes by using additional wage types and then activate the infotypes.** This makes the required data from the payroll results available in the logical database PNP.

### USA: Infotypes for tax reporting

The pre-defined infotypes 0446 and 0457 are also used for tax reporting. These infotypes have been created specifically for the USA. For more information, see [US Tax Payroll Infotypes \(0446 - 0457\) \[Ext.\]](#).

### Prerequisites

You must have performed the following steps before you can set up the evaluation of payroll results using a query or ad-hoc query:

- In Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll results* → *Set up Payroll infotypes*, you have set the required payroll infotypes to active. You can create new payroll infotypes based on pre-defined payroll infotypes and then enhance these to meet your requirements.
- The infotype was filled out with the information from a payroll result. You have two options:
  - Data is automatically transferred to the infotype in each payroll run, provided that Customizing has been set up accordingly. This is done in Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll Results* → *Set up assignment for payroll*.
  - You can enter data in the infotype without a payroll run using report RPABRI00.

### Activities

For information on evaluations using a query or ad-hoc query, see [BC - ABAP Query \[Ext.\]](#). For information on evaluations in Human Resources, see [Maintaining Queries in the Human Resources Application \[Ext.\] \(HR\)](#).

## Payroll Results Infotypes: Period Values (Infotypes 0402 and 0403)

### Definition

The *Payroll Results* infotype: The *Payroll Results Period Values* infotype (0402) contains information from the payroll results for the regular payroll run. Infotype 0403 is identical and is not required at present.

The start and end date for the infotype correspond to the payroll period.

### Structure

You define the structure of the infotype in Customizing for *Personnel Management* under *Payroll results*.

You cannot maintain the infotype on-line. You can maintain the infotype using one of the following methods:

- The data is automatically updated when the payroll run has been completed successfully, however, this must be set up accordingly in Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll results* → *Set up assignment for payroll*.
- You can update the data at a time of your choice using report RPABRI00.

You can use this infotype as a base for evaluating the results of a regular payroll accounting run using the Query and Ad-hoc query.

---

**Monthly Cumulations (Infotype 0458)**

## Monthly Cumulations (Infotype 0458)

### Definition

In the standard system, the *Monthly Cumulation of Payroll Results* infotype (0458) contains general information from the payroll results and also cumulation wage types that refer to one month. This can be helpful if the periods for your payroll run are weekly and not monthly or if payroll is run using a different frequency.

The start and end date for the infotype correspond to the cumulation period. If your employee, for example, leaves the company in the middle of a cumulation period, you can still access the cumulated values.

### Structure

You define the structure of the infotype in Customizing for *Personnel Management* under *Payroll results*.

You cannot maintain the infotype on-line. You can maintain the infotype using one of the following methods:

- The data is automatically updated when the payroll run has been completed successfully, however, this must be set up accordingly in Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll results* → *Set up assignment for payroll*.
- You can update the data at a time of your choice using report RPABRI00.

You can use this infotype as a base for evaluating payroll results using the Query and Ad-hoc query.

## Quarterly Cumulations (Infotype 0459)

### Definition

In the standard system, the *Quarterly Cumulation of Payroll Results* infotype (0459) contains general information from the payroll results and also cumulation wage types that refer to quarterly values.

The start and end date for the infotype correspond to the cumulation period. If your employee, for example, leaves the company in the middle of a cumulation period, you can still access the cumulated values.

### Structure

You define the structure of the infotype in Customizing for *Personnel Management* under *Payroll results*.

You cannot maintain the infotype on-line. You can maintain the infotype using one of the following methods:

- The data is automatically updated when the payroll run has been completed successfully, however, this must be set up accordingly in Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll results* → *Set up assignment for payroll*.
- You can update the data at a time of your choice using report RPABRI00.

You can use this infotype as a base for evaluating payroll results using the Query and Ad-hoc query.

---

**Annual Cumulations (Infotype 0460)**

## Annual Cumulations (Infotype 0460)

### Definition

In the standard system, the *Annual Cumulation of Payroll Results* infotype (0460) contains general information from the payroll results and also cumulation wage types for annual values.

The start and end date for the infotype correspond to the cumulation period. If your employee, for example, leaves the company in the middle of a cumulation period, you can still access the cumulated values.

### Structure

You define the structure of the infotype in Customizing for *Personnel Management* under *Payroll results*.

You cannot maintain the infotype on-line. You can maintain the infotype using one of the following methods:

- The data is automatically updated when the payroll run has been completed successfully, however, this must be set up accordingly in Customizing for *Personnel Management* under *Human Resources Information System* → *Payroll results* → *Set up assignment for payroll*.
- You can update the data at a time of your choice using report RPABRI00.

You can use this infotype as a base for evaluating payroll results using the Query and Ad-hoc query.
