# Update Guide for SAP Asset Strategy and Performance Management

# Typographic Conventions

Type Style	Description
<i>Example</i>	Words or characters quoted from the screen. These include field names, screen titles, pushbuttons labels, menu names, menu paths, and menu options. Textual cross-references to other documents.
<b>Example</b>	Emphasized words or expressions.
EXAMPLE	Technical names of system objects. These include report names, program names, transaction codes, table names, and key concepts of a programming language when they are surrounded by body text, for example, SELECT and INCLUDE.
Example	Output on the screen. This includes file and directory names and their paths, messages, names of variables and parameters, source text, and names of installation, upgrade and database tools.
<b>Example</b>	Exact user entry. These are words or characters that you enter in the system exactly as they appear in the documentation.
<Example>	Variable user entry. Angle brackets indicate that you replace these words and characters with appropriate entries to make entries in the system.
EXAMPLE	Keys on the keyboard, for example, F2 or ENTER.

# 1 About this Document

This document describes a step-by-step procedure on how to set up the SAP Intelligent Asset Management solution.

## Note

This guide is intended to provide documentation support for organization administrators to update to a new release of the product.

## Audience

This guide is intended to provide documentation support for organization administrators to update to a new release of the product.

## 2 Updating Roles and Role Collections

### Audience

This content is relevant for all customers.

### Context

With this release, multiple roles have been added. The table provides you with an overview of the role changes for this release:

Role	Status	Application Identifier
FLOC_READ	New	ac_broker
FLOC_EDIT	New	ac_broker
FLOC_DELETE	New	ac_broker
WORKORDER_READ	New	ac_broker
WORKORDER_EDIT	New	ac_broker
WORKORDER_DELETE	New	ac_broker

### Note

In order to use the new functionalities with this release, the role collections have to be updated accordingly. For more information about the roles and role collections for SAP Asset Strategy and Performance Management, see [Roles and Role Collections](#).

### Procedure

To update the role collections, proceed as follows:

1. In the SAP Cloud Platform Cockpit, navigate to your subaccount.
2. From the navigation menu, choose *Security > Role Collections*.  
The list with the role collections is displayed.
3. In the list, choose the role collection name that needs to be updated.  
The overview screen of the role collection is displayed.
4. On the screen, choose *Edit*.  
A new row is displayed below the *Role Name* column.
5. To select the role that needs to be added, choose .  
The *Select Role* dialog box is displayed.
6. In the dialog box, select the role, role template, and belonging application identifier. You can also select the application identifier first and then choose from the respective roles that are available in this identifier.

- 
7. To add the role, choose *Add*.  
The role is added to the role collection.
  8. Repeat the steps above for all roles that need to be added.
  9. To save all role updates, choose *Save*.

# 3 API Access using SAP ASPM Business Service

## Audience

This topic is relevant customers who have not already created a service instance for SAP ASPM.

## Prerequisite

You should have administrator access at both global account and subaccount level.

## Procedure

1. Enable Cloud Foundry(CF) if it is not already enabled for your subaccount.
2. Go to your global account and click the *Entitlements* tab in the side panel.
3. Edit the entitlements and add the quota for Asset Strategy and Performance Management to your cloud-foundry-enabled subaccount by clicking on the '+' button.
4. Choose *Save* at the top.
5. Go back to your CF-enabled subaccount.
6. Now go to the *Spaces* tab in the side panel of your CF-enabled subaccount. Create a new space or, if you already have a space, you can use the existing space as well.  
Enter your space and click *Service Marketplace*, where you will find the service tile for Asset Strategy and Performance Management.
7. Click on the service tile and navigate to the *Instances* tab in the side panel. Create a new instance by choosing *New Instance*.
8. Click *Next* for Choose Service Plan, Specify Parameters, (Optional) and Assign Application (Optional). Enter a suitable instance name in the *Instance Name* field and choose *Finish*.
9. Click on the newly created instance name. Navigate to the *Service Keys* tab and choose *Create Service Key*.
10. Provide a suitable service key name and choose *Save*.

Now you can find the client credentials in the service key in the following parameters:

Client Credentials	Parameters
Client ID	uaa.clientid
Client Secret	uaa.clientsecret
Token URL	uaa.url + '/oauth/token'
Application URL	endpoints.aspm-service

# 4 Updating the Custom Fiori Launchpad (FLP) Content

## Audience

This topic is relevant for customers who work on extensions.

### Note

If you have deployed custom Fiori launchpad:

- After an upgrade, you must either clear cache or redeploy custom Fiori launchpad to get the latest UI resources.
- Content transport mechanism is yet to be supported for custom Fiori launchpad in SAP Intelligent Asset Management. You have to update your custom launchpad for any new tiles introduced in that release.

## 4.1 Custom Fiori Launchpad is already deployed

If custom Fiori launchpad is already deployed, follow the steps below to upgrade the launchpad content to the latest release:

1. Copy all the changes you have added to custom fiori launchpad project from previous release.  
Your changes could be in `mta.yaml`, `CommonDataModel.json`, `xs-app.json`, or `18n` files.
2. Download the relevant FLP content.

3. After you have imported the new Fiori launchpad, add the changes from step 1 to the newly imported Fiori launchpad project.
4. After you have imported the new FLP, add the changes from step 1 to the newly imported fiori launchpad project.
5. After all these changes have been made, you can build and redeploy the FLP. You can right-click on the project to build it. To Deploy you will find the mtar file under `mta_archives` folder.
