Feature Scope Description for SAP BTP Connectivity

Content

- 1 **About this Document.** **3**
- 2 **Features.** **4**
- 3 **Browser Support.** **5**
- 4 **Service Level Agreement.** **6**

1 About this Document

This document describes the Connectivity features that are available in SAP BTP.

The availability of some of them may depend on your license agreement with SAP. To illustrate integration with other SAP offerings, the product documentation on the SAP Help Portal might include references to features that aren't included with SAP BTP. Features that are not included in this feature scope description might require a separate license.

2 Features

SAP BTP Connectivity includes the following features and capabilities:

Feature	Description
General	
Access to remote services for SAP BTP applications	Access remote services that run on the Internet or on-premise from your SAP BTP applications.
Support of SAP HANA Development	Create XS destinations for connecting your HANA XS applications to the Internet and on-premise services.
Support of Java and ABAP systems	Establish connections to both Java and ABAP systems in your on-premise landscape.
Cloud Connector for on-premise support	Install and run the Cloud Connector in your on-premise network to establish secure SAP BTP connections.
Cloud Foundry Environment	
Connect applications in the Cloud Foundry environment	Connect any application running in the SAP BTP Cloud Foundry environment to on-premise systems.
Support of HTTP, RFC, TCP	Use HTTP or RFC via secure Cloud Connector tunnel to connect your Cloud Foundry applications to on-premise systems. Use HTTP to connect any application running in the SAP BTP Cloud Foundry environment to remote services that run on the Internet. Access on-premise systems from a Cloud Foundry application via TCP-based protocols, using a SOCKS5 Proxy.
Create and bind service instances	Create service instances and bind them to a Cloud Foundry application.
Manage destination information in the Cloud Foundry environment	Use the Destination service to manage the destination information required for connecting your Cloud Foundry application to a remote system.

3 Browser Support

For SAP BTP Connectivity, the general restrictions of the SAP BTP apply. The following browsers are supported on Microsoft Windows PCs and, where mentioned below, on Mac OS X:

Browser	Versions
Microsoft Internet Explorer	As of version 11 (end of support: October 1, 2021)
Mozilla Firefox	Extended Support Release (ESR) and latest version
Google Chrome	Latest version
Safari	Latest two versions (for Mac OS X only)

4 Service Level Agreement

For more information, see [Service Level Agreement for SAP Cloud Services](#). This agreement document for cloud service offerings from SAP forms the basis of your contractual relationship with SAP when referenced in specific order forms. This document contains a specific section about SAP BTP covering uptime, credits, update windows, and others.

Important Disclaimers and Legal Information

Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
 - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.
 - SAP does not agree or disagree with the content on the linked-to site, nor does SAP warrant the availability and correctness. SAP shall not be liable for any damages caused by the use of such content unless damages have been caused by SAP's gross negligence or willful misconduct.
- Links with the icon : You are leaving the documentation for that particular SAP product or service and are entering a SAP-hosted Web site. By using such links, you agree that (unless expressly stated otherwise in your agreements with SAP) you may not infer any product claims against SAP based on this information.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Gender-Related Language

We try not to use gender-specific word forms and formulations. As appropriate for context and readability, SAP may use masculine word forms to refer to all genders.
