# 1 About This Document

The feature scope description shows you which features are provided with SAP Order Management foundation. In addition, this feature scope description also defines the feature scope description as the product documentation for SAP Order Management foundation, as defined in the SAP Terms and Conditions.

## Licenses

Please note that for certain features you might need a separate subscription license. For further information, please contact your SAP Account Executive.

## 2 Features

Get a high-level overview about the features of SAP Order Management foundation.

SAP Order Management foundation allows you to receive orders for physical and subscription products from multiple channels. The APIs provide basic order management functionality along with business configuration settings to customize your solution. You can also integrate various systems to support order management processes. This allows you to leverage your existing master data, order capture, and fulfillment systems while consolidating order-related data in a convenient cloud-based solution.

The service offers the following key features:

<b>Manage Orders</b>	Use our solution for basic order management functions, such as receiving orders from integrated order capture systems and viewing order details.
<b>Send Orders for Fulfillment</b>	Set up the product sourcing and fulfillment process based on your business needs. Send orders to your integrated fulfillment system to trigger the fulfillment process.
<b>Replicate Order-Related Data</b>	Replicate order-related data from your integrated systems into SAP Order Management foundation. For example, replicate your business partner and product master data.
<b>Analyze Your Data</b>	SAP Order Management foundation supports integration with an analytics system (currently SAP Analytics Cloud). Send your data to the analytics system for analysis.
<b>Create and Monitor Order Activities</b>	Create and monitor activities that provide the latest updates in an order and extract data for further analysis.
<b>Manage Flows</b>	Use our solution to manage automated flows for business activities and monitor the process execution.

# Important Disclaimers and Legal Information

## Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
  - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.
  - SAP does not agree or disagree with the content on the linked-to site, nor does SAP warrant the availability and correctness. SAP shall not be liable for any damages caused by the use of such content unless damages have been caused by SAP's gross negligence or willful misconduct.
- Links with the icon : You are leaving the documentation for that particular SAP product or service and are entering an SAP-hosted Web site. By using such links, you agree that (unless expressly stated otherwise in your agreements with SAP) you may not infer any product claims against SAP based on this information.

## Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

## Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

## Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

## Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
