Preface

Thank you for your interest in our software. This guide shows the Feature Scope Description of **SAP Engineering Control Center interface to Teamcenter**.

Prerequisites

This description is based on the assumption that users are familiar with the use of the application and SAP PLM. It is assumed that users are able to create, open, and modify documents and are familiar with the concepts of SAP PLM.

Directory Names

We use the default settings including the directory names created by the standard installation in explanations. If you are using different names, you must replace these accordingly.

Since you can choose any installation directory, we use the synonym `%PLM_INSTDIR%`.

Your Comments are Always Welcome

We greatly appreciate your remarks and your criticism as a reader of this guide. Your opinion helps us to continuously improve the software as well as the documentation.
