#### **About this Document**

This document contains important information about fixes present in SAP BusinessObjects BI 4.2. Before installing the software, we recommend that you read the entire document. To find more information about this release see: http://help.sap.com

# **SAP Notes for SAP Business Intelligence Suite 4.2**

#### **SAP BusinessObjects Analysis**

SAP Note Link	Description
2030067	Analysis for OLAP hangs forever due to its complex MDX vs Excel performing the same filter
2030558	Analysis for OLAP Prompt Values using Wild cards are not working as expected
2037630	Webi reports based off of SSO enabled universes fail with codepage conversion error
2050793	Analysis for OLAP Web errors out AOC00041 when exporting to Excel or CSV when and object has been hidden on SAP HANA model
2050855	An error has occured while processing a request from Analysis for OLAP when trying to add Date Value that it has a null value on the key figures
2054128	Characteristics added in Analysis for OLAP Workspace after exporting to Excel and changing prompts input are lost
2060463	Columns do not align when exporting .CSV
2064318	Swap with dimension doesn't give error
2064857	After providing prompt values for an Analysis Workspace, the browser tries to leave the page
2104062	Indentation for hierarchy is lost when exporting a workspace from Analysis, edition for OLAP to Microsoft Excel
2117015	Error occurs in Analysis for OLAP while adding a background filter on date type dimension in range which doesn't exist in destination HANA database
2118974	Login failed when using an OLAP connection to HANA using BusinessObjects credential mapping
2120149	Issues when filtering a medium size dimension in Microsoft Analysis Services
2122988	Poor performance Analysis OLAP HANA
2123517	AOC00041 error throws when Draggining the dimensions on crosstab
2127546	Analysis Olap Performance Degradation
2128705	User Interface rendering error upon resize of Analysis edition for OLAP workspace
2134586	Creating Jumplink to CR with parameter passed having Space throws error
2136127	Analysis Edition for OLAP Single Value required prompt disable the OK button
2136185	Once exported to Excel, an Analysis edition for OLAP workspace with exceptions and hidden measures shows invalid coloring
2136186	AOLAP column descriptions do not align with querydesigner
2136872	Issue with Default members in MSAS

2138744	Key and Text of attributes are not separated when exporting to Excel from Analysis for OLAP
2140315	Choose Connecion Tab configuration
2141415	AOLAP - Support for manual entry of multiple values in Selection Option variables
2144383	Dates from HANA are not displayed in the correct format in Analysis for OLAP
2146259	Analysis custom calculations
2149645	AOLAP Find Member for Member Selector
2152840	Selecting Exclude and Not Equal options in a prompt and entering multiple values separated by a semicolon gives incorrect output in Analysis for OLAP
2155811	Filter by measure fails in analysis olap
2161114	Enable Drill through feature in AOLAP for Microsoft SQL Server Analysis Service
2162400	Conditional formatting with "Applied to" doesn't work in Analysis edition for OLAP
2163167	Analysis for OLAP RRI Connections are kept open when corresponding crosstab is deleted
2164099	Rows are not aligned in Analysis, edition for OLAP workspace with long text in attribute members
2164846	Jumplink functionality is not working
2167068	Error message shows up from BI Launchpad to Change SAP BW Password when STS with SSO is being used with Analysis for OLAP
2169591	Export to Design Studio Error
2170350	Fiscal Year/Period characteristic is not properly sorted out in Analysis edition for OLAP documents
2172495	After exporting from Analysis edition for OLAP, hierarchy members of type Date transpose into text in Microsoft Excel
2174123	"Any unsaved changes will be lost" warning message should not be displayed in Analysis edition for OLAP for users who have only Read rights or when no changes are applied to the opened document
2174556	Searching Business Explorer query by non English description fails in Analysis edition for OLAP when the preferred viewing locale is set to a different language
2177232	Special characters are not properly displayed in the tooltip in Analysis edition for OLAP in both Columns and Rows headers
2185024	Exceptions defined in queries from Business Explorer Query Designer are not reflected on Analysis edition for OLAP documents.
2188835	Indentations defined in a Business Explorer Query structure are omitted on Analysis edition for OLAP documents.
2193229	Unable to view Analysis Application which was converted from Analysis edition for OLAP

2193868	Condition "TopN" in BEx query is not taken into account in Analysis edition for OLAP workspace
2199049	The name of a BI workspace displayed in a tab of the BI launch pad toolbar is changed when viewing an Analysis edition for OLAP document.
2203162	Jumplink from AOLAP to CR and WEBI Document is not working
2208588	Analysis OLAP shows Cube last update date in GMT timezone
2215051	Analysis edition for OLAP workspace looses prompt values
2221607	Some errors are thrown while opening an Excel 2007 (or later) document containing data exported from an Analysis edition for OLAP workspace.
2223075	Analysis edition for OLAP is slow to display list of members in filter panel
2225537	Cannot open saved Analysis worspace created on an OLAP Connection
2225574	Analysis edition for OLAP conditional formatting disabled in exported Analysis Application
2228256	Analysis edition for OLAP does not export Analysis Application suited for smartphone usage

### SAP BusinessObjects Business Intelligence Platform

SAP Note Link	Description
2010248	The script is run twice when run a script based probe in Monitoring once
2012443	Scheduling a publication containing documents with Unicode name, and packaging as a Zip file, the names of the documents within the zip file are corrupted
2029034	BI launch pad Probe is not working in BIP4.1
2036394	Parameter of datatype TIMS (TIME) in a function module is not working in Crystal Reports
2047581	BI 4.1 - Sharepoint 2013 - Ribbon options greyed out post install of IOMS
2053660	Picklist (parameters list) in Crystal Reports in BI Launchpad appears "flat" not showing the hierarchies when using non-SAP users with SNC configured
2054294	Error happens when refreshing Crystal reports with large amount data from SAP ODS data source
2058753	Delegated administrator cannot export Crystal Report to LCMBIAR
2061559	View Crystal reports off SAP Connection from BI Launchpad, Date format is incorrect with 'Use Browser Locale' setting
2061739	Failed to compare if the LCMBIAR filename contains upper case in Visual Difference
2061836	An error occurred while retrieving synchronized live data (MON00047) in CrystalReports Monitoring probe

2068923	FBE60203 error happens when running a publication job which contains the source document which has the special 'Schedule for' setting
2069302	Information space takes more than 20 seconds to populate in 4.1 SP3
2072478	performance issue while loading SAP prompting page or using opendoc to view SAP report
2073693	Unauthorized modification of displayed content in BI-BIP-INV
2075485	Low and Medium tracing does not generate in BI 4.1
2076064	User is not able to Logoff when AD SSO is enabled after using a Folder link URL
2077426	The "Show Instances" hyperlink within a BI Launchpad search result will display 5 random instances rather than the most recent 5 instances
2079645	Promoting reports which are part of publication stops refreshing the reports
2079717	Server Description Issue
2080314	Bo webpart redirests to home page.
2080930	SAP HANA Overrides are not being updated
2081656	Windows AD group issue caused by CMS_ALI
2081902	BI 4: After a web tier only install of SAP Business Objects BIP 4.0 the default logon CMS shows the web machine and not the CMS machine
2082387	Changing the configuration settings while Rescheduling the Publication and the new values are not reflecting in the new rescheduled instance.
2084247	Visual Difference does not work in few locales
2084333	While viewing the Hyperlink from the BI Launchpad, getting HTTP 404 Error.
2085286	Multi-click Applications Menu causing flickering effect
2087603	Error occurs when openning opendocument link for Crystal Reports for Enterprise document on BI4.1
2092188	BI 4.1 SP02+ Sessions are not released in the CMS when closing iViews
2094324	Promotion Management job status does not reflect the status of the current job.
2094343	CMS failed to save OutOfBoxCrystalReportsNextGenProcessingServer_CrystalReportsNextGenProcessingServiceContainer_dfo_frag.xml
2095895	Viewing CR4E reports instance gives following error "The viewer could not process an event.Failed to read in-memory value.[JRC00005392] ErrorCode:0[CRWEB00000119]"
2096073	When using SI_VIEWER_URL to send alert notification in email, receiving "http://*****" in the email in place of a valid URL.
2096653	Indexing blocked due to inconsistent delta indexes and surrogates
2096969	BO 4.0 Monitoring Misleading Alerts
2097107	Adding new Keycode for SAP Lumira Edge
2097271	VMS shows Incorrect Modified Date in Promotion Management

2098677	Unauthorized modification of displayed content in Promotion Management Application
2099472	BI Launch Pad and CMC can't pick correct zh_TW locale setting
2103523	Email destination is not saved when creating publication
2104802	Some calculated key figures defined in bex query display incorrect results in Crystal reports
2107078	Failed to schedule a customized trigger event with a disabled alert using .NET SDK
2107694	The expiry date is randomly set when scheduling report to Run Now
2108185	The Modified Date in History page of the Version Management tool is not correct
2109484	Performance Issues on Instance Manager
2109631	LCM Overrides modifying DB config
2110315	NWBC: no open document links for Design
2110390	edit navigation list fails for French Language in BIWorkspace
2112359	Last Run date not showing after migration using UMT
2113508	Getting Error Message "Running the program failed with error code -1." intermittently while scheduling program objects
2113721	Unauthorized modification of displayed content in BI-BIP-LCM
2113787	Default Watches in monitoring application do not adhere correctly to the caution rule condition.
2113843	Crystal Reports Report Application Server 2011 watchlist metrics' 'document_s_' refer to "Total Doc Count"
2114094	Web Intelligence Page not refreshing
2114641	BI Web Services incorrectly returns SI_MOBILE_PROPERTIES, SI_DESCRIPTION for reports
2115095	The RFC session does not get closed immediately after the data refreshing or closing the Crystal Report in BI Launchpad or CMC
2116478	Report name comes as 'Not Available' if 'Merge Exported PDF' option is used in publication destination.
2116966	New Keycodes for Lumira Edge and PA
2118000	BW publisher service missed user configuration after BI Patch install
2118152	LCM:Overwrite ignored for CR Publication
2118522	Active Directory Changes not Reflected
2118661	Time zone changes for Moscow, St. Petersburg and Volgogard in IOMS.
2118668	Timezone for Moscow should be corrected
2119042	BI Launchpad menus display in English instead of browser's locale when opening reports from NetWeaver portal using Knowledge Management iView integration
2120996	"Number of indexed documents" change to 0 after restarting the Adaptive Processing Server and when the indexing is not started

2121480	Folders cannot be deleted from the left-hand column (folder tree) of the BI LaunchPad in BI Platform 4.1
2123818	SNC no longer functions after installing BI4.0/4.1 Patches
2124733	BI4.1: When logging in to RCT customer is getting error with wrong Username / PW / Port. (RCT 00022)
2124892	Trying to display a monitoring alert created for an event throws the error: Error # 1085
2125149	Incorrect value of Deployment Level Metrics for "Monitoring Users" group
2126414	The Monitoring RMI JMX agent end point URL in SAP BusinessObjects Business Intelligence Platform 4.1 SP05 does not work if clustername is not exactly same as the hostname
2127187	When scheduling a repository object with Monthly Reccurence N=1, the recurring instance is not created.
2130467	Unauthorized modification of displayed content in Performance Management Application
2130811	Failed to compare Jobs in Visual DIfference
2131062	Unauthorized modification of displayed content in Performance Management Application
2131064	Unauthorized modification of displayed content in Performance Management Application
2131065	Unauthorized modification of displayed content in Performance Management Application
2131081	Unauthorized modification of displayed content in Performance Management Application
2131184	Incorrect Title in pop up window
2131354	Tomcat goes into infinite loop and causes CPU usage to 100%
2131480	Promotion job dependencies are not copied when copying from an existing job
2131556	4.1 SP05 FHSQL - 1000 row limit on connection is introduced by the conversion engine and webi runs with partial results
2131669	Unknown Session
2131724	When click on open the Design Studio Bookmark in the new window, the Design Studio BookMark URL changes and a session specific URL is created
2132498	InfoView: Appplication and Help menus are hidden behind webi applet in RTL.
2132988	Internet Explorer hangs when changing the destinations to BI Inbox or Email in the schedule page.
2133463	Principals not holding on to the root folder when they are imported via a BIAR file
2133727	SAP BusinessObjects Central Management Server crashes on systems with large Web Intelligence InfoObjects
2134270	CMS crashes and Federation Jobs fail when certain Federation Jobs are scheduled

2134395	InfoView: iframe is not removed from the HTML(DOM) in the Chrome browser.
2134933	Federation reports "Success" when Federation jobs fail
2135713	Update Destination Directory using Java publication SDK
2137338	Support for design studio 1.4 documents in BI Workspace.
2137769	Exception thrown when adding a Webl report to a Promotion Management job in BI 4.1 SP5
2137846	Incident 82642 / 2015 / Windows AD default domain in italian
2138011	System Slider not appropriate when language is non english
2138773	When using Folder Link users have to click the "Logout" button twice in order to logoff when Windows Active Directory SSO is used
2139519	SAP Authentication link fails with HTTP 500 error after BI4.1 SP5 upgrade
2140690	CMS may crash when using relatives() in the query predicates
2141510	When using Siteminder user accounts are recreated
2142007	Server Description
2142485	View SAP Integration Kit Report in BI Launchpad with SAP Server SNC, SAP prompting page does not work.
2145921	Promotion Job fails immediately with "FAILURE" error in BIP 4.1 SP04 Patch 1.
2146572	Error shows up when using web services: Initialization failure
2147348	SFTP Destination
2147393	SMTP with SSL
2147892	BI 4.1 SP05 - dswsboje via WACS gives HTTP 500 errors "No Java compiler" or "ClassNotFoundException: org.apache.jsp.axis2_002dweb.index_jsp"
2148207	LDAP queries fetching all groups attributes when login on BI Launchpad with a user that is not member of any mapped groups
2148268	Not able to open txt, rtf, zip files through OpenDocument.
2150518	Multiple emails are sent out in publications when dynamic recipients list contains duplicates
2150944	Application Security Migration in Promotion Management
2151568	In the Audit database, the start_time for file event trigger-based timestamps is recorded in local time instead of GMT / UTC
2153454	Creating a BI Workspace and dropping a Crystal Reports or Crystal Reports for Enterprise report opens an Excel file instead of the report
2153824	The sessions created when viewing crystal reports using URL reporting do not get cleared after session timeout
2153826	BI 4.1 Error: unable to access <bean name=""> MBean.Continuing with next managed entity in the Adapative Processing Server logs</bean>
2153924	Filter icon is not functional in the BEx Report
2154072	Health State metric of some servers shows "UNKNOWN VALUE" in BI 4.1

2154373 URL truncation due to GET request in Vintella servlet (Windows AD SSO)  Multiple errors are occurring when navigating from prompts link to other link	
in publication Scheduling page	
Garbled characters appears in the CMC tab configuration page if a non- English product locale is set	
2156341 Email notification from BI Monitoring alert does not work consistently	
2156647 Searching in the CMC is slow or does not bring back results	
BI 4.1 : DeskI report converted in WebI format shows orange colored borders and background in HTML	
2157092 Assigning of aliases is very slow with large number of non-enterprise users	
Removing the cache of InfoStore service object on LogonComponentRenderer	
Any changes to the OLAP connection from the CMC are not being picked up in the Design Studio report	
2160813 Promotion via CTS fails with JCO error	
2161571 Unauthorized use of application functions in BI Workspace	
A publication based on a Crystal Reports for Enterprise report using a BEx Query fails with error FBE60502 when a filter mapping is defined for personalization purposes	
2164648 Unauthorized modification of displayed content in BI LaunchPad	
Tomcat crashes with out of memory error whilst creating a Promotion 2164661 Management Job	
Tomcat outage due to hanging CMS thread when logon with secSAPR3 credentials through BlLaunchpad/Opendocument	
2164898 ConnectionServer Disabled watches in BI Platform by default	
Frequent errors in CMS traces: "Event type id (1004) is missing mandatory details" when refreshing Webi reports based on Bex OLAP connections	
Unauthorized modification of displayed content in Performance Management Application	
BI SAP Entitlement System cannot be created properly if the SAP BW user password contains special character(s)	
BusinessObject_EventServer generates a wrong "Out of Memory" event in the Windows event viewer	
BI 4.x Central Management Server either hangs or crashes during Groups Update process (all third-party authentication types, Active Directory / LDAP / SAP / etc.)	
BI LaunchPad search failed with "String is too generic (PSS 02001)" when refining a search	
2169386 SAML SSO between HANA and BI failed with errors	
OLAP creates 4 invalid connect atempts. In case of hana for one wrong password user gets locked.	
2470400 IAVA 0 appropriisite unite DIWartengas	
2170109 JAVA 8 compatibility with BIWorkspace	

2171731	The parameter order is not updated when the Crystal reports document is re-published to BOE by BW Publisher
2171790	Job server child with CR opensql driver will hang if there are some dumps happened in SAP system
2173862	Unable to logon using SAP authentication after a while
2173926	In Version Management, when accessing the second page of the View Deleted Resources list, a 404 error occurs.
2174799	BI Launchpad and CMC do not show object's localized traditional Chinese name in the listing page on IE on Windows 8.x
2175099	Newly created user attributes are not showing in correct order
2177624	Unable to reschedule a recurring instance of a publication
2178638	Roles list is empty when configuring enterprise system with /crystal/ rptadmin
2178826	BI 4.1 - LCM_cli.bat fail with "Job empty; queries return empty result set"
2179088	Cannot copy & paste a Web Intelligence document into the same folder when it has a folder which has the same name as the Web Intelligence document
2181866	Error when editing navigation list content in BI workspace when the chosen Webi document contains special characters like: $\acute{e}$ , $\ddot{a}$ , $\&$
2183209	Support XBOOKMARK Parameter for Design Studio Bookmark feature
2183804	Configurable option to skip instances from Platform Search indexing
2184271	Crystal reports overrides does not update the password when the report is promoted to the destination.
2185486	Unable to login with full user DN when access to LDAP root DN is denied
2188549	BI 4.1 - CMS crash when retrieving a large amount of users with "User Attribute Management"
2189849	Improved InfoStore Query Performance
2190010	Auditing logs are pending because of error "String data, right truncation"
2192296	Exception while saving BI Workspace if title contains special characters like $\%$
2198522	Monitoring : Adding of CrystalReport services(processing server) or Crystal Report Services gives error while creating watch
2201709	In BI4.1 SP06, when adding objects in Version Management of the CMC, a yellow warning triangle appears saying "The Version in CMS is newer"
2202950	NullPointerException when comparing LCM Jobs in Tomcat 8 + Java 8
2205025	Error when launching Prompts window while rescheduling a failed Crystal Reports for Enterprise instance
2207048	In the Central Management Console, an HTTP Status 500 error is displayed when adding objects to an existing Promotion Job.
2207160	Fail to schedule or refresh Crystal Reports against SAP Function on Windows Server 2012 R2 Platform
2207348	No Error handling in Copy an Existing Job page

2207577	Crystal DHTML Viewer throws 404 error through reverse proxy
2207586	Dashboard icon not displayed when promoting Dashboards
2208243	SIA overrides the hostname in introscope template file
2208423	OpenDocument shows blank screen while opening report which consists prompt having sInstance=Param parameter
2209449	When "Last Run" column is unchecked in BILaunchPad preferences, Inbox needs 2 clicks to display
2210358	web page module is not working through navigation list.
2212654	Performance issue in publication with thousand of dynamic recipients
2213809	The 0 plug-in does not exist in the CMS error is displayed when assigning security in the CMC

### **SAP BusinessObjects Dashboards**

SAP Note Link	Description
2069166	Menu bar displays in English despite Dashboards being installed with Spanish language on Spanish Operating System
2073189	Dynamic visibility not working properly when using listview and reset button in Dashboard.
2073743	Reset button doesn't work for range sliders of charts.
2073781	Chart markers disappear or display randomly as bars when previewed in a browser.
2086440	Result objects not visible in query browser when the key figure in the bex query contains a double quote in Dashboard
2086789	The LOV of prompt selector disappear after clicking reset button
2086938	For Dashboards, Local Scenario button cannot restore prompt selector value sometimes.
2087602	There are two Spanish options in language drop down list.
2096894	Tab set component breaks the rendering of the SWF file.
2098790	XML Data connection always trims leading whitespaces
2110677	Vietnam by province Map in Dashboard Designer is outdated.
2110695	Add a new Brazil by province map in Dashboard Designer
2113476	Series markers dissapear intermittently when using Animation option in Line chart.
2117736	Primary Y axis labels missing for column Line chart in Dashboards
2123718	Mobile preview not working for the dashboard based on the query browser connection with a formula variable defined on bex.

2125987	Dashboards shows Mouse over values, Data labels values incorrect on chart
2126635	Data label in Pie chart is shown in the strange position after upgrading to Dashboards 4.1 SP05
2127250	In Dashboards, update Indonesia map with Kalimantan Utara province (North Kalimantan).
2130404	In dashboard designer, the tab of tab set component is not changed while value of selected Item changed.
2136477	Fail to open dashboard client with registry value NoRecentDocsHistory=1.
2155810	Scrollbars is missing intermittently for Query Browser panel with many queries after openning Dashboard in Dashboard Designer.
2164193	Excel XML maps are not updating
2171658	SAP BOBJ Dashboards doesn't retrieve correct data when universe field is updated.
2184917	SAP Dashboards can't connect to Microsoft SQL Server 2008 or above Reorting Services reports
2189326	Some values with decimal are not showing properly when displayed within Charts.
2199587	Spreadsheet table disappears after using the reset and push buttons in SAP Dashboards
2223959	Unable to overwrite an existing dashboard if a Webi report of the same name exists in the same folder

## **SAP BusinessObjects Desktop Intelligence**

SAP Note Link	Description
1998454	LastExecutionDate() in newly created Desktop Intelligence reports, displays incorrect day, correct time, if created after 8:00 pm EST (equivalent to midnight UTC / GMT).
2048053	Unable to view PDF or XLS instances of Desktop Intelligence in user's inbox
2049352	BI Launchpad does not display the parameters used to process an existing Desktop Intelligence instance (DCP)
2075829	UDT Login performance Issue
2076386	Copy All function doesn't work when data contains Japanese Kana character with Hyperlink
2083591	Missing one column when exporting to Excel format in the Desktop Intelligence
2085560	The dimensions are not sorted in data tab of Deskl, especially the same object in different data provider

2089240	XI 3.1 SP7 : Median() formula returns incorrect results in Desktop Intelligence
2125724	Sum() ignores global filters in XI 3.1 SP7 Desktop Intelligence

### **SAP BusinessObjects Explorer**

Ability to move an Exploration view set to another folder  2013119 Ability to log "Exploration View" object action in the auditing database  2045441 Unable to open view set in launchpad after upgrade to BI 4.1 SP04  2057436 Search problem with full width space in SAP BI Explorer  Explorer services show "You must restart the server for changes to take effect" when a request port is used instead of "Auto assign"  No calculated measure is available in one Information Space on BWA InfoProvider after change source is performed on it after migration  2078091 Explorer Master Server stops unexpectedly  BI 4.1 - Adding InfoSpace to Promotion Management Job leads to "Failed to get dependencies of the job.(PRS 00048)"  No response clicking the "OK" button of the Information Space Personalization tab in SAP BusinessObjects Explorer 4.1 SP4  2099886 Information space go missing intermittently from home page  2099887 Synchronization issue about displaying list of datasources and creating new Information space on Manage Spaces  2101998 Incorrect number of records presented in Information Space when using Excel as a datasource  2120855 Stacked column and bar charts show full columns for zero values in Explorer  2129353 Information spaces on explorer home page are not displayed when switching over from Exploration View Sets tab to Information Spaces tab. ### **SAP BusinessObjects Web Intelligence**

SAP Note Link	Description
2002165	Wrong time sent to reporting database when selecting a date between the 28/03/2014 and 02/04/2014 for Israelian timezone
2003588	When refreshing a Web Intelligence report based on a multisource .unx, the prompt window shows "no values to display" for the list of values
2011745	Unselected 'Show top header' and 'show left header' in XI 3.1 become selected but invisible when report is migrated in BI 4.1 using Upgrade Management Tool
2013175	When viewing a Web Intelligence report, columns containing merged cells are shifted incorrectly compared to earlier BI4.0 versions
2017182	BI 4.1 : Error message appearing in WebIntelligence need to be improved
2018352	Previous() function crashes Web Intelligence processing server
2019038	Hierarchical List of Values fails in displaying values in Web Intelligence if we have a Data Security Profile assigned to the universe
2031139	Web Intelligence Processing Server crashes and restarts itself when opening a very complex report.
2036077	The values disappear if using a variable instead of a formula in the column of the Web Intelligence report
2036251	Incorrect values for measures in a Web Intelligence crosstable
2037147	Default sort is not working in Webl
2038931	Filter is not taken into account when filtering "EMPTY VALUE" in filter bar in Webl using the java applet
2039411	"LO 02026" error is raised when inserting one Web Intelligence table into Live Office in Excel
2041500	Incorrect results are observed when using Ranking when a variable is used by the "Rank by" option in the Rank options
2041605	Translation for folder in UNX universe cannot be reflected in report filter bar of Web Intelligence document
2043605	#UNAVAILABLE error in a UNV based WebI report migrated from BI 4.0 SP05 to BI 4.1 SP02
2044141	In a Web Intelligence document based on BEx (BICS), Collapse All Hierarchies doesn't work.
2045215	#TOREFRESH is displayed for all measures of a Web Intelligence report when the report is used as part of a Publication
2047573	BI 4.1 : 'updateRS' 30270 API' error when trying to remove a section from a Web Intelligence report

2047687	Expression with SUM and IF returns incorrect value
2048005	'Invalid name: expected "Body", but was: "runQueryAsAService".(CDS 10200). (IES 10853)' when using a Query As a Web Service query created with Russian language
2048707	Changing source in RESTful WS SDK APIs fails when using a document based on a universe which does not exist anymore in the CMS.
2049021	When you migrate a Web Intelligence document from XI 3.x to BI 4.1 SP3 or SP4, input controls disappear from the document
2050341	OK button is greyed out when Web Intelligence prompts are entered from User Prompt Input in Web Intelligence HTML interface
2050731	An error is thrown when refreshing a document after a change source using the WebIntelligence RESTful Web Service SDK when prompts are removed.
2052500	Webi Instance Migrated from XI3.1 to BI4.1 does not Export all data to Excel or PDF
2052588	Web Intelligence cache is growing continuously beyond the set value if the Output Cache Directory location is specified as a Network drive/UNC path.
2053747	Drill window is too small and didn't contain scroll bar to select multiple drill path if the client's screen resolution is 1280 * 768 or lower
2054026	BI4.1 : Using Text Join in SAP Hana to retrieve localised master data is working in Information Design Tool but not in Webi Rich Client and Web Intelligence Launch Pad
2054173	When exporting a Web Intelligence report that contains a large number of HTML-formed hyperlinks to Excel (xls or xlsx) or PDF, the resulting files only contain a limited number of clickable hyperlinks
2056253	Live office Syntax error
2056430	Web Intelligence Rich Client only shows 3 ranges in the list when it is using EXCEL data source and Range Name is used as Field Selection
2056666	BI4.1: Error WIS 10850 when changing datasource from a local Excel file to another excel file present in the repository
2057903	Text or CSV (archive) outputs of a Web Intelligence report ignores the date format / number format defined at the report level
2058335	Rows missing when querying a Date/Time object in Qaaws with timezone
2059588	Users will not able to change the universe from BI Launchpad once "Query script - enable viewing (SQL , MDX)" right is denied for Web Intelligence application.
2060141	In Safari on Mac OSX, in a Web Intelligence report opened in the Web Intelligence HTML interface, the shortcut keys can display as "???"
2060532	When opening or editing Web Intelligence reports in BI Launchpad, the Navigation Map displays incorrect sections in certain scenarios
2062109	When a new input control is created in the Rich Internet Application Java Applet, if the dimension that is chosen has all null values, then not all of the input control types will be available to be selected.
2063811	When interacting (delete / rename / duplicate a report) or modifing a element in a report within a Web Intelligence report, an error "RS must be validated! (Error: INF)" or "An error has occurred" appears

2064193	Not all Input Control are showing on a Web Intelligence report, when a report has purged data and is opened in the Rich Internet Application
2065016	Web Intelligence cells in the same table column show inconsistant behavior
2065066	Values having same descripton but different key used into a report filter are not correctly displayed in 'Selected Values' list in Web Mode
2065599	XI 3.1 & 4.1 : Webi shows wrong data if the text file used as data source contains double quotes.
2065607	Web Intelligence Query panel in Web Mode, Run Query button is misplaced when screen resolution is set to xxx*768 in Internet Explorer
2065871	Web Intelligence Rich Internet Application issues: JRE8 compatibility with OSX UI, free text field contextual menu, grid space set to zero and snap to grid option activated
2066436	#MULTIVALUE Error in SAP BusinessObjects Enterprise XI 3.1 Service Pack 5.
2066452	A Query Filter prompt does not show the saved values when scheduling or refreshing a Web Intelligence report
2066477	Wrong Prompt Summary in Webl report with 2 queries when using and changing Bex variables
2067281	Strange chart color modifications in Web Intelligence document when filter is applied
2067590	The message "A filename cannot contain any of the following characters" is observed when saving a Web Intelligence report using an ampersand, (&) character in Web Intelligence Rich Client
2067672	Inconsistent data returned for the variable object which have aggregation formula
2067820	The XLS and XLSX output of a Webl report shows incorrect "last modified" and "created" dates when opened in Excel 2010
2068389	OpenDocument doesn't work from a child Web Intelligence report when displayed in a BI Workspace
2068869	BI 4.x Web Intelligence Processing Server on Unix dumps core when the Adaptive Processing Server housing the DSL Bridge Service is terminated.
2069343	Changing the Page orientation or Page Size in a Web Intelligence report in the HTML viewer triggers Siteminder CSS blocking
2069849	Business Intelligence 4.1: "UserResponse()" with hierarchy variable does not return the full string when viewing an instance after scheduling
2069881	Error "List of Values <objects_id> not found !" in User Input Prompt panel when keydate variable is present</objects_id>
2070110	When importing reports into Web Intelligence Rich Client from the BI 4 server, it does not save them in the customized "User documents" folder
2070311	An error occurred from the prompt dialog. (LO 02031) error occurs when Live Office accessing the List of Values which contains NULL value
2070446	Autofit with special characters display incorrectly in Web Intelligence BI Launchpad
2070834	BI4.x: Input Control based on a measure variable causes 'An error has occurred' when attempting to save the Web Intelligence report

2070865	A red X is observed in Web Intelligence reports instead of a chart after migration from XI 3.1 to BI 4.1
2071954	In Web Intelligence reports, when filtering data via an Input Control spinner, the up/down arrows give unexpected results if the locale is set to Spanish.
2072147	Inconsistencies in Web Intelligence when results from another query contains null values
2073252	Text in Chart titles and legends is not wrapped for migrated reports from XI3.x. Text is truncated or not visible in full.
2073583	Web Intelligence report is showing blank page when printing on virtual printer or physical printer
2073782	A newly added object is missing in the WebIntelligence document
2073924	In Web Intelligence Web mode, when the "Read content as" option of a cell is set to "Hyperlink", the hyperlink containing Java script code doesn't work
2074063	When using the Translation Management Tool to translate a Web Intelligence report to Indonesian, the translations do not appear when viewing the report
2074184	When viewing a Web Intelligence report that contains element linking and a Report Filter, the selected value for the element linking is not highlighted
2074188	Performance issue with specific report migrated from XI3.1
2074399	Error occurs when hierarchy is expand in Web Intelligence document having "Avoid duplicate row aggregation " option checked
2074433	Filter bar in a Web Intelligence document does not filter empty values in Web / HTML interface
2074664	Issue in web services consumption if there is a space at the beginning of the prompt question
2074746	It is not possible to create Web Intelligence Rich Client document based on huge .xlsx Excel file as a data source
2074816	No prompt window appears when clicking on an openDocument link within a Web Intelligence report in the Rich Internet Application /
2074937	Custom "Prompt Order" functionality does not work properly in Web Intelligence reports in the HTML viewer
2075065	BI 4.1 : Error Cannot build the query or generate the report. (WIS 30351) occurs when clicking on "view script" after cancelling context selection window in Web Intelligence documents
2075118	Performance regression between XI3.1 and Web Intelligence 4.1 when navigating between tabs, changing input controls or changing filter bar values
2075347	While refreshing a Web Intelligence report based on a multisource universe that uses a calculated column in the query panel, the error "CSError: Bad Value for Field" (IES 10901) (WIS 10901)" appears
2075776	Detail object shown as dimension in the filter bar in Web Intelligence
2075868	Change source should support default or partial mapping.
2076184	The parameter value can't be passed properly when Japanese prompting text is included in OpenDocument

2076550	Text field to enter prompt values is no longer available when checking/ unchecking the option "select only from list".
2076707	Business Intelligence 4.1 : Not all functions are showing in the correct language when Web Intelligence preferences are set to something else than English
2076786	In BI Launchpad, when opening a Web Intelligence report in the HTML viewer then quickly switching Launchpad tabs, the Documents tab is incorrectly renamed to the report name
2076940	ERR_WIS_30270 happens in Combined query when it is using the Generic ODBC data engine in the connection and trying to view the SQL generated
2078064	The "Date Modified" property observed in the CMC for a .unx universe is incorrectly updated when a Web Intelligence report based on the universe is saved to the BI 4 environment
2078215	Sharepoint - Unable to refresh Web Intelligence document with prompts
2078981	Error "a null object loaded from local variable 'server' (Error: INF)" dispay while view the Web Intelligence document from BI Launch Pad after the Preferred Viewing Locale change
2079541	Switching between differents queries in the Web Intelligence Query Panel or Viewing the SQL of each query cause errors (WIS 30351 and WIS 30270)
2079570	'updateRS' API error occurs if we unset upper limit and lower limit on Rank properties in Web Intelligence document's in DHTML mode
2079807	Custom values are missing (Error: ??? 00000) while doing Change Source of a migrated Web Intelligence report with Input Controls
2079808	Input Control 'Simple slider' is showing as scroll bar when variable value is equal to the maximum value in HTML viewing mode in Web Intelligence
2080036	Chart images within an .xlsx Excel file exported from Web Intelligence are all titled with the same name
2080521	BI4.1: Context menus cannot be activated in WebI Rich Client when logged in in Offline mode
2080757	When using the VisualizationConfig.xml, the expected "Corporate" palette is not used as the default in new charts in Web Intelligence reports for many chart types
2080953	Using the Web Intelligence Rest SDK, a Child List of values is not populated in a cascading prompt when the Parent prompt is optional
2081200	While fetching the Dataproviders list or details of a Webi Document built on Text or Excel or No Data Source, the RESTful Webl Get request throws "Internal error (RaylightAction)".
2081646	No error message even though value of parameter "Binary Stream Maximum Size" exceeded
2081654	Variables\Formulas in webi report giving wrong results after upgrading from Business Intelligence 4.0 Support Package 05 Patch 5 to Business Intelligence 4.1 Support Package 03 Patch 4
2082169	Custom sort applied on Group variable is lost after reopening the Web Intelligence report and updating the group variable with new values
2082185	Business Intelligence 4.1: Quick Display Mode with Folded breaks cause duplicate break totals on duplicate pages in a Web Intelligence

2082185	Business Intelligence 4.1: Quick Display Mode with Folded breaks cause duplicate break totals on duplicate pages in a Web Intelligence report
2082994	The Page Layout settings defined in the WebIDefaultStyleSheet.css file do not display properly in Web Intelligence reports
2083066	Border style shows as double in Format Table dialog box after setting the border as single border in Java mode
2083474	When attempting to change the Align / Relative Position settings in a Web Intelligence report, an error appears
2083562	Opening Web Intelligence reports via OpenDocument links results in blank reports and charts

"Unknown right" is displayed for "Desktop Interface - enable local data
2112173 providers" in the Central Management Console
Using Navigation Map in Web Intelligence Web Mode (DHTML) does not highlight report tabs beyond field of view
The Formula bar is not shown the first time a Web Intelligence document is created in the Rich Internet Application
Formulas having FOREACH fail to display values if there is a section applied on the block containing the formula
A blank page is displayed when viewing a Web Intelligence instance scheduled in PDF format using WebLogic
Refreshing the list of values for Web Intelligence document, the values displayed in Web Intelligence HTML interface are incorrect
Different 'query properties' values are displayed in Web Intelligence Applet interface and Web Intelligence HTML interface
Business Intelligence 4.1 : Changing formula in a Web Intelligence report removes report pages when viewed in Web Intelligence HTML interface
2113290 Manually entered prompt values are not saved after refreshing the report
Clickable hyperlink number might be less than expected when exporting to Excel a Web Intelligence document that contains a large number of HTML-formed hyperlinks
BI 4.1 : 'No data to retrieve' error when cancelling inlist prompt and running the Web Intelligence query in HTML interface
A report using wingdings font characters above character 159 fails to export to PDF with a GetPages API error RWI 00200

2114052	Save as dialog didn't inherit the locale setting in OpenDocument
2114259	Saving as Excel a WebIntelligence report from WebIntelligence Rich Client is slower in SAP BusinessObjects WebIntelligence 4.x than in 3.1
2114488	Empty instances are generated when a publication filtered by a numeric dimension is scheduled using a non English preferred viewing locale
2114577	Dashboard is randomly not complete when consuming multiple different "Document As A Web Service" web services
2115463	Manually entered values in a Web Intelligence report or block filter does not work as expected
2115648	In Web Intelligence, one row data is lost in every thousands records if using XLSX EXCEL as data source
2115651	Dependent prompts does not refresh second time subsequently and throws error: "AnswerPromptslov' API error
2115770	Error encountered when opening a Web Intelligence document reporting off of SAP BW BEx queries and Universes in BI 4.1 SP05.
2115971	Web Intelligence BI 4.1, custom report cell size is lost when exported and viewed in Excel
2115985	When exporting a Web Intelligence report to .xlsx and opening the resulting file, the error "Excel found unreadable content in ' <document name.xlsx="">" appears</document>
2116134	Web Intelligence Java clients are unable to display hyperlinks properly if the URL contains line breaks or carriage returns.
2116479	BI 4.1: Table alignment not maintained in Web Intelligence across IE 9, 10, Google Chrome and Firefox.
2117435	Meaningless error message is raised when running a query that contains an incorrect measure filter in Web Intelligence
2117837	Input control (Tree list) on Bex hierarchy is not updating correctly the report with values selected using the descendants option in Web Intelligence HTML interface
2118469	An (IES 00013) error is observed when refreshing a list of values within the Prompt window of a Web Intelligence report
2118566	Restore dialog never comes in Web Intelligence Web mode when user is not assign Full Control to Web Intelligence Application
2118811	Missing rows when exporting huge Web Intelligence document to Excel
2119580	Performance of prompts when scheduling WebIntelligence reports is very slow in BI 4.1
2120206	Unable to edit or enter values in the Query Filter within the Web Intelligence HTML interface when using Internet Explorer 11
2120283	Business Intelligence 4.1: Opening a Web Intelligence report with sections in Business Intelligence 4.1 Support Package 04 or Support Package 05 results in an empty table. Report navigation map has become empty.
2120594	Opendoc link to open instance with matching prompt value opens the last instance
2120833	BI 4.1 : When applying groups to number values in web Intelligence Report ,these values are formatted incorrectly as decimal ones.

2120999	ERR_WIS_30270 error happens when you refresh a WebIntelligence report containing combined query for several times
2121276	Business Intelligence 4.1: When browsing a large folder structure from Web Intelligence Rich Client, performance is extremely poor. Slow to open and navigate to folders or go back to a previous folder.
2122070	Web Intelligence locks up when purging data from a report
2122739	Object Description window remains open and hangs all process of Web Intelligence HTML / Web interface when the user clicks on backspace
2123333	Incorrect prompt order for HANA variable in WebIntelligence
2123557	Wrong break footer values and SUM values when adding a break to a Web Intelligence report Table
2123853	Web viewer for Web Intelligence duplicates the default List of values in the user prompt input panel when refreshed.
2123910	Cannot show entire text of the Universe object description in Web Intelligence if description contains a lot of lines
2124668	Navigation Panel in HTML Design mode throws error: The action cannot be performed. (Error: INF) with document having query strippping
2124706	Values repeated when used with multiple select statements in "Result From Another Query" filter
2124821	Web Intelligence Web mode Formating rules contextual menu is always active
2124846	HTTP Status 500 - org.apache.jasper.JasperException in the Central Management Console
2125903	If a freehand range or a named range is defined on empty cell in an xls file, range is ignored in Web Intelligence
2127640	Group customization is not applied when view/modify mode is Web Intelligence HTML interface
2127653	Error when trying to jump to the last page of a WebIntelligence report in Quick Display mode.
2127743	#Syntax and #Computation errors displayed on all dimensions after the refresh of report containing hidden objects
2127787	When creating a new report in the Web Intelligence HTML interface, the User Input Prompt information is not displayed until the User Input Prompt tab is clicked
2127945	When printing a Web Intelligence document with more than 5 report tabs, some report tabs are not printed and some pages are blank
2127980	Error appears after clicking on the Drill button then click on the Snapshot button in Web Intelligence when the preference "On duplicate report" is set
2128351	The error "You do not have access to one or more data providers, only the ones for which you have permission will be refreshed.(Error: WIS 30286)" appears when refreshing a Web Intelligence report
2128402	Ranking window and Edit Document Summary windows are not displayed properly when editting Web Intelligence document in HTML mode with lower screen resolution like 1024*768
2129105	Aggregation in cross-tab with constant axis returns incorrect result in row direction

2129270	In HTML mode, you can't set different border style, thickness, and color for each axis (left border, right border, up and bottom border) for a Web Intelligence document
2129490	In Web Intelligence Rich Client or Web Intelligence Applet interface, when creating a variable, additional carriage returns are added to the formula definition. This does not impact the results in the report (which are correct).
2130128	"Could not retrieve the list of values' MSGV1: Enter only one hierarchy (IES 00013)" when trying to refresh List Of Values for object used in Query filter
2130795	Slow opening of a Web Intelligence report in two environments running same version
2131258	Internal error returned while performing a save as on an existing document in RESTful WS SDK API.
2131560	WIS 30270 error occurs when hierarchy prompt filter and flat prompt filter share the same prompt text in UNX based Webl
2131667	Newly added fonts are not working in Web Intelligence document
2131674	Thousands separator is showing when refreshing Web Intelligence report based on Excel
2131762	BI 4.1 : Date generated when running a WebIntelligence report based on Bex query is showing the previous day
2133061	Business Intelligence 4.1 : Extra blank page showing in a WebIntelligence report at the end of each section
2133172	Cannot create Double Slider Input Control in Web Intelligence with Java 8
2133208	"Hide When Empty" does not hide empty tables in Business Intelligence 4.1 WebIntelligence
2133242	An empty prompt dialog box appears when executing a query from Web Intelligence's User Prompt Input panel.
2133832	Cannot migrate document instance created in SAP BusinessObjects Enterprise XI 3.1 SP5 with Upgrade Management Tool in SAP BusinessObjects Business Intelligence platform 4.1 SP05
2134212	The PromptSummary() and QuerySummary() Pre-Defined cells show prompt value numbers with commas in the Web Intelligence HTML interface
2135278	Same formula shows different values in WebIntelligence report after migrating from Business Intelligence 4.0 Support Package 05 Patch 04 to Business Intelligence 4.1 Support Package 05
2135826	Opening a Web Intelligence report in Modify mode from BI LaunchPad may give the error:The document cannot be loaded. (IES 10833)
2136554	Web Intelligence document display #MULTIVALUE or incorrect values from formulas evaluated with incorrect input context after applying Business Intelligence 4.1 Support Package 04 or Support Package 05
2136554	Web Intelligence document display #MULTIVALUE or incorrect values from formulas evaluated with incorrect input context after applying Business Intelligence 4.1 Support Package 04 or Support Package 05
2136701	Size of dialog box for Web Intelligence Formula Editor is uncorrect when screen resolution is set to 1360 x 768px

2136803	Publication containing a multi-tabbed Web Intelligence document does not show correct selected report
2138304	Unable to set intervalSize for number of values returned in a cascading List Of Values prompt using Restful Web services API
2140292	DSL Bridge Service thread locks when processing large number of requests
2140649	Cannot refresh List of values for defined filters in Web view mode using universe based on BEx queries.
2140734	RWI 00200 error occurs intermittently when saving a Web Intelligence document in TXT format using Rich Internet Application
2140735	Scale to Page is not fitting perfectly if the Page size is increasing in a very little rate
2141022	Web Intelligence Applet becomes unresponsive due to the input control used in a report
2141190	When setting the default Universe for WebIntelligence in the BI Launchpad Preferences, creating a new document results in the wrong universe displayed as the default
2141486	Perspectives and path issue (ChangeSource Wizard Errors)
2141685	State Flag not being set in Central Management Console after making changes to the Web Intelligence Processing Server.
2142076	RAYLIGTH SDK return an empty dataset
2142246	Web Intelligence HTML interface does not display trailing whitespace defined in a Custom Number Format
2143090	Row alignment changed in Excel when saving Web Intelligence document as Excel (.xls)
2143332	Text (.txt) output of a Web Intelligence report generates two blank lines at the bottom of the table
2143390	Selection Option Variables appear as a List of Values instead of a Range in Web Intelligence reports in certain scenarios
2143472	Unable to search using intervals or expressions for Date objects in Selection Option prompts within Web Intelligence reports
2143501	The "Format Data Series" option is missing from the right-click menu for Charts in the Web Intelligence Web mode interface when using more than 32 measures in a chart
2145091	After an upgrade from Business Intelligence 4.0 to 4.1, the "Start on a new page" and "Avoid page breaks in section" options are disabled, but before migration these options were enabled
2145189	In Web Intelligence reports, conditional formatting doesn't applies when using "Cell contents" for some Filtered object or cell section
2145326	Web Intelligence HTML viewer renders a blank frame
2145445	Using Conditions with Compounded Objects when Manually Entering a BW Prompt causes an Error
2145561	Web Intelligence reports in excel format are showing missing charts, section / text when selecting the Web Intelligence option 'Prioritize easy data processing in Excel'

2145657	In Applet mode, interface becomes unresponsive when you set increment to 0 for an Input control of type "number"
2145790	Paste special should not copy the inputControl filters between two documents
2145832	An internal error occurred while calling 'processGroupingVariable' API (Error ERR_WIS_30270)' Error when trying to modify/update a grouping variable in Web Intelligence
2145925	Scheduling not displaying manually entered prompt values
2146480	Double thick border applied to a table does not show as expected when the Web Intelligence report is opened in PDF format.
2146663	UserResponse Cell shows blank for manually entered values for prompts
2146681	A blank document or unexpected HTML code is visible when removing a report level filter from Web Intelligence documents
2147318	Cannot select individual objects using the Mac "Command" key in Safari running on OSX in the Web Intelligence Applet interface
2147348	SFTP Destination
2148189	Drill Filter bar does not distinguish same objects from different query by query name in Web HTML Interface
2148239	Session Failover not working when viewing UNX based reports on Linux clustered BI4 environment
2149015	RESTful SDK Call Issue
2149020	Not possible to export chart image using javascript API
2149047	Web Intelligence recurring instances, containing date parameters and having being migrated using Upgrade Management Tool, fail with "Unparseable date" message
2149719	Unable to create a Web Intelligence document based on an Excel spreadsheet that is stored in the BI environment using Web Intelligence Rich Client in 3-tier mode
2150224	In Internet Explorer 11, Web Intelligence HTML mode query panel a double click is required to insert cursor in query filter text field
2150405	Error "The Object at position 1 does not exist in the report" IES 10006 when validating a variable in Web Intelligence HTML interface mode containing a Bex calculated key figure with carriage return in the name description
2150409	When interacting with List of Values within the Web Intelligence HTML Interface, the cursor is sometimes off focus and another value is selected instead
2150636	Adding sub-query in query filter containing already existing sub-query does not work systematically in Web Intelligence
2151274	BI4: Unable to 'Save As' an opened Web Intelligence document after deleting in JAVA applet view mode of BI Launchpad
2151475	WIH 444444 error occurs when refreshing a dynamic list of values based on a derived table
2151784	Cannot create a input control based on merged hierarchy
2151885	DOUBLE border lines are displayed as PLAIN borderlines, in the Web Intelligence HTML interface

2154043	Web Intelligence schedule fails intermittently with error "An internal error occurred while calling 'processDPCommandsEx' API. (Error: ERR_WIS_30270)"
2154473	The SQL that is generated in a Web Intelligence report unexpectedly changes when the report is refreshed more than once
2154955	Live Office documents based on Web Intelligence reports that contain prompts with the option "Keep last values selected" do not save the last value selected
2155077	An error "name can't be null" occurs when adding an hyperlink in a cell of a Web Intelligence report, in place of the add hyperlink dialog box on Mac OS.X with Java 8
2155322	Web Intelligence Report elements are not correctly updated after refreshing datas with hierarchy in a report containing filters
2155329	UNDO operation does not work on a deleted Input Control
2155401	Instances of Web Intelligence report are refreshed while trying to view them from BI LaunchPad
2155999	Unable to perform a search in a List Of Values in Live Office Query panel
2156188	The error message "Database error: (CS) "Error on Fetch" shouldn't appear in the Audit report.
2156525	'No data to retrieve' window not displayed in Web or Interactive view mode for Web Intelligence documents in BI LaunchPad
2156559	Scheduling a Web Intelligence report to a filesystem destination without specifying a user fails
2156765	The color of the png image in HTML Viewer changes and is not the same as in Java mode
2156765	The color of the png image in HTML Viewer changes and is not the same as in Java mode
2156931	When canceling the request of closing a current page or tab, the Web Intelligence document is closed
2156985	Web Intelligence reports fail with the error "'processDPCommandsEx' API. (Error: ERR_WIS_30270)"
2157421	When using Query drill, combined queries don't reflect the query filters as per the drill operation
2158274	Tables are not aligned as expected when viewing a Web Intelligence document in the HTML Interface
2158318	Sections are ignored when creating a report with SAP BusinessObjects Business Intelligence platform 4.1 REST SDK
2158511	"Error: ERR_WIS_30270" when 2 users are opening the same report at the same time using 2 different Preferred Viewing Locale.
2159493	Using Input Control slider with French locale in Web Intelligence causes incorrect decimal symbols to be displayed on the slider bar
2159589	Web Intelligence RESTful API (Raylight) call to GET a Web Intelligence document is significantly slower after upgrading to SAP BusinessObjects Business Intelligence platform 4.1 SP05
2160109	Column with paragraph text is not correctly cut between pages in Web Intelligence

2160535	Web Intelligence Input Control is not showing correct values when used in Applet Mode
2160639	Saving a Web Intelligence report as PDF results in ######## displayed randomly throughout the PDF document
2160697	When creating a Grouped variable, if it contains values with double quotes, the result is a #ERROR when inserting the grouped variable into the Web Intelligence report
2160769	Hyperlink does not work in HTML viewer when Drill is enabled on the object containing the hyperlink
2161286	The User Prompt Input allows manual entry of incorrect values in Date prompts in the Web Intelligence HTML interface
2161618	Can't drag object from objects list when editing Web Intelligence report in HTML mode
2161938	Report filter behaviour is incorrect when based on a key object, causing an empty report with no data when data does exist.
2162933	Cannot add hyperlink to a Web Intelligence document if the table contains too many columns in Web edit mode
2163380	Refreshing one query from a document based on BEx queries in Web mode purges the other queries
2163659	Index aware prompt didn't work as expected in Web Intelligence
2163757	Unexpected blank column appears after setting breaks in a cross table of a Web Intelligence report
2163966	When using drag and drop feature for header, the formula changes to =NameOf(NameOf()) resulting in #Datatype
2164016	For some timezones, while scheduling Web Intelligence report, the timestamp in the prompt changes if the value selected is 01/01/1900
2164805	View or edit the Web Intelligence document in DHTML mode, the garbage code is displayed for the name of "Favorites Folder" and "Public Folders"
2165393	The number of prompts in the Web Intelligence viewer does not match the number of prompts returned by the Web Intelligence Restful Web Services SDK
2165605	Complex join is becoming a self join after converting the universe from Unv to Unx in Information Design Tool
2165809	Resizing column size response time is x2 slower than SAP BusinessObjects Enterprise XI 3.1 SP06
2166348	Business Intelligence 4.x: Input control based on hierarchy causes empty table with no data. Resetting the input control (selecting & unselecting a value) causes the expected data to be displayed in table.
2166477	Web Intelligence Reports containing an input control in XI 3.1 and are migrated to BI 4 contain an additional filter after migration
2166508	Error in ICmsHelper when using Restful SDK
2166952	The @Variable parameters such as DOCID do not display the list of values at the prompt
2167057	The mouseover / hover values are incorrect on a chart in Web Intelligence reports using the Web Intelligence HTML interface viewer / editor

2167204	The SQL should not be updated in Web Intelligence in HTML mode, if the related universe has been changed
2167584	After migrating a Web Intelligence report with a chart from SAP BusinessObjects Enterprise XI 3.1 to SAP BusinessObjects Business Intelligence platform 4.1 the Y axis scale is incorrect and repeats values
2168201	OLAP connection with Single Signed On authentication will not work when SNC name is used to retrieve BW groups
2168679	Hierarchical drill down between filter values in Web Intelligence report does not cascade correctly in HTML view mode
2169747	Cannot move objects freely in query panel using Web Intelligence Applet interface or Web Intelligence Rich Client
2169899	When adding a level of a hierarchy into a block in a Web Intelligence report, all measures disappear
2170048	SUM() function based on dimension detail is returning different values when the formula is used in table and free cell in a Web Intelligence report
2170522	Cannot change the background color on a cell in Web Intelligence HTML mode using Internet Explorer 8 or Internet Explorer 11
2171190	In HTML viewer, custom input control does not work for the first time however with second selection of List Of Values, it works perfectly fine
2171263	Context window keeps popping-up when trying to run Web Intelligence query with combined query or when refreshing a Web Intelligence document that is based on a universe that contains multiple contexts
2172155	If sending a Webl document via e-mail with "As unsecured WID" option, Webl/Outlook sends the email with the .wid as attachment but the attached report is locked
2172500	Incorrect values are displayed when expanding a hierarchy through the context menu "Hierarchichal navigation>Default level expansion>2"
2172609	The cursor is off focus when choosing an universe near the bottom of the list in the Web Intelligence HTML interface with Japanese locale in IE11 or Chrome
2172773	Query Panel becomes empty while using excel sheet containing only one rowto create Web Intelligence reports
2172907	If you save a Web Intelligence document in structure mode then reopen it, it will open in data mode
2173054	In 'Manage Palettes' dialog box palettes are partially displayed and are truncated in Web Intelligence Web Mode
2173057	In Web Intelligence Web Mode, Color opacity related sliders don't work in
2173066	Performance issue in SAP BusinessObjects Business Intelligence platform 4.1 when modifying a Web Intelligence report in structure mode, navigation and modification are very slow
2173137	RWI 00011 error occurs when formatting data series for legend in Web Intelligence Applet interface or Web Intelligence Rich Client
2173300	Impossible to use the Coma ',' when using Web Intelligence report with Netherlands language and Applet Mode
2173463	Not getting any response from RESTful web services when trying to get Metadata of a Web Intelligence document inside an Object Package

2173487	Chart Sorting Lost After RESTful Call
2173573	Problem upgrading Web Intelligence report from SAP BusinessObjects Enterprise XI 3.1 to SAP BusinessObjects Business Intelligence platform 4.x : Variable Dim1 added to the document
2173579	"Java heap space" error received when trying to select Analysis View to create a Web Intelligence report
2174032	Web Intelligence Manage Groups dialog box does not display values
2174466	Error occurs when adding a calculation on a cross table with Java Client
2175474	In SAP BusinessObjects Business Intelligence platform 4.1 when using Web Intelligence with a global and crosstab table filter, you get a #Unavailable error after migrating from SAP BusinessObjects Enterprise XI 3.1
2175889	Objects in 'Based on' option in the Web Intelligence ranking does not show the query name in HTML mode
2176281	Cannot get the list of of values dependent on two (or more) optional nested prompts with Web Intelligence RESTful web service
2176498	When refreshing or scheduling a Web Intelligence document that contains an universe level prompt, error "ERR_WIS_30270" is returned
2176797	In Web Intelligence, there is an inconsistent behavior with [NULL_VALUE] in Input Control
2177235	Outline of report is not expanded after migration of reports from BOXI 3.1 to BI 4.1 environment.
2177260	"You do not have the right to access data returned by this universe. (Error: INF)" error when refreshing a Web Intelligence document based on BI Web service
2177337	When using BI 4.x and are modifying a Web Intelligence report in the query panel, when changing queries back and forth the previously opened folders are closed when you return to the query
2179481	Web Intelligence Rich Client crashes while exporting document to XLS
2179530	The data is limited to 9999 when Web Intelligence report is created on .xlsx and Range selection of more than 10000 rows
2179917	Changing BW Variable name in BEx query does not reflect in the Set Variables dialog box
2179944	Rescheduling from the Web Intelligence instance displays default prompts that are saved with report rather than instance prompt values
2180105	Column headers that contain constant strings are shrunk vertically so that the values are not visible in structure mode in Web Intelligence
2180459	Web Intelligence BI Variant : skipped answered are not correctly managed
2180512	Wrong language showing when turning a Web Intelligence table to chart when language has been set to German in the Preferences
2180871	Error if you click prompt mutiple times when scheduling a Web Intelligence publication
2181278	When using Dutch as Preferred viewing local in Live Oflice, a decimal List Of Values is converted to integer

2181805	Using Web Intelligence RESTful WebServices, simple filter inside Ranking Filters is ignored
2181867	Missing or incomplete audit events in the audit database - Error message seen in the Central Management Server trace logs
2181874	Report columns may be splitted across pages when opening a migrated Web Intelligence report in page mode
2182053	Extra comma generated when export Webl document as CSV archive file in Web Intelligence HTML interface
2182615	When Scheduling on behalf of other users with the Web Intelligence RESTful SDK, the returned instance ID is not a valid id of one of the resulting instances
2182794	Several Cancel on a Web Intelligence report based on Bics containing multiple queries generate an error
2183023	When there is no Input Control defined in the Input Control area, the text is not correctly wrapped in the Java Viewer
2183086	Purged prompt are still showing in Web Intelligence report when language is set to German in the Preferences
2183121	Opendocument does not work correctly when setting the BI LaunchPad preferences to 'In multiple full screen browser windows, one window for each document'
2183545	Web Intelligence open document link is not working
2183712	If you use a ";" as an entry for an input control in Web Intelligence it will reset all filter conditions applied to the report block
2184728	"SAP SE has stopped working" error message when trying to navigate SAP BusinessObjects Business Intelligence platform 4.1 Enterprise folders in Desktop Intelligence
2185057	In Web Intelligence Applet interface, the run query button has got a wrong display when we are using multi data provider with Custom Data Provider Excel as data source
2185370	Scheduling a document with a datetime prompt using the Web Intelligence RESTful Web service may result in empty instances or unexpected data
2186963	HTML Viewer - Apply format on chart axis doesn't work
2186980	Empty values are generated when scheduling a Web Intelligence publication filtered by a numeric datatype object when values are over
2187026	In the Web Intelligence Query panel, in Web mode (HTML), there is no warning message for invalid format number or date
2187036	When editing or updating a Web Intelligence report which uses an Excel XLSX as a personal data provider without any text inside, an error is raised
2187590	In Business Intelligence 4.1, when using Web Intelligence document, if any value of your dimension contains a '\$' then it breaks Outline expand and collapse
2187650	Prompts in a Web Intelligence report based on a cascading List Of Values created in Information Design Tool generate invalid SQL when scheduled
2188325	In Business Intelligence 4.1 when using Web Intelligence in HTML, an element linked object does not stay greyed out when Input Controls are changed

2207566	ERR_WIS_30270 when refreshing report that contains a universe level prompt
2207702	Unable to open a Web Intelligence report that contains a complex formula after migrating from SAP BusinessObjects Business Intelligence platform 3.1 to SAP BusinessObjects Business Intelligence platform 4.1
2207911	When migrating a Web Intelligence report from XI 3.1 to BI 4.1, charts are not showing anymore. Red Cross is displayed instead.
2208169	Event Status "Edit Failed" get recorded in auditing database after saving correctly Web Intelligence documents that use contexts
2208295	Rescheduling instance of a Web Intelligence report fails when document and prompts values are purged or prompt has option "Keep last values selected" unchecked
2208310	Opendocument link does not pass Index
2209293	Data is missing from the table with smart measure and one variable getting values from two dimensions in Web Intelligence document
2210221	In SAP BusinessObjects Business Intelligence platform 4.1 Support Package 06, when trying to use opendocument in Internet Explorer 11, prompt values are passed incorrectly
2210720	In the query panel, the description tooltip of subfolders does not display in Web Intelligence HTML interface
2211093	Backward compatibility Folder
2211117	When opening an autosaved Web Intelligence report, you get the error OpenDocument API (ERR_WIS_30270) (Error: INF)
2211650	Maximum number of connections exceeded
2211754	Parent checkbox shows the same symbol when parent object is selected or not when viewing Web Intelligence document in Web HTML Interface
2212636	Incorrect SQL is being generated for a Web Intelligence query which has been duplicated from a query containing custom SQL
2212645	In Web Intelligence, cannot pass date value "01/01/1970" in query filter using Date object as prompt
2212722	Web Intelligence report with multiple queries might not always show a table in View Mode or in Design Mode with Data when document property Extend merged dimension values is turned on
2213565	Data disappers while changing values multiple times in an Input Controls from Web Mode
2213990	Dashboard performance Issue in SAP BusinessObjects Business Intelligence platform 4.1 Support Package 05 Patch 6

2214274	Missing 'last update' datetime in scheduled instance details with Web Intelligence RESTful web service
2214275	Changes on unx universes are not reflected in Web Intelligence
2214301	Invalid Date not validated in HTML mode by Web Intelligence from BI LaunchPad
2214309	Customization for a User Group does not work for hiding sub tabs in the Design Mode Toolbar
2214723	Missing 'patch number' information with Web Intelligence RESTful web service
2215436	A custom numeric function implemented using Web Intelligence Extension points, replaces a variable which uses 'Abs()' function.
2215454	An error occurs when selecting Unassigned node as answer for a BW Hierarchy Node variable.
2215865	Error message appears when creating a new Web Intelligence report containing a comma as a decimal separator in a Query Filter using Web Intelligence HTML interface
2216030	Aggregation variable with In Report operator shows #UNAVAILABLE in Section of a Web Intelligence report
2216225	Different behaviour with hidden predefined filter objects showing in Web Intelligence depending if you are unx or unv universe and what View/Edit mode is used.
2216412	Deleting a document/user delete belonging variants, but document and user folder remains
2216520	The currency symbol does not appear in values within Web Intelligence documents when the data source is based on Excel
2217118	BICS connection range value is not shown in Web Intelligence HTML viewer
2217488	In a Web Intelligence report, a drill filter applied to a dimension containing carriage return doesn't work.
2218251	When refreshing a Web Intelligence document based on a unx universe that connects to an OLAP data source, a #SYNTAX error is observed
2220027	Export a report element inside a section of a purged Web Intelligence document through RESTful web service yields to an error.
2220419	Error message appears when refreshing a Web Intelligence report which contains a Mandatory Prompt defined on the report level and this object has an Optional Variable in the particular BEx query
2220715	When both manual input and selected value in cascading list of values, system only returns values following selected values
2221073	The date / time displayed in a prompt is incorrect when scheduling a Web Intelligence document
2221798	It is possible to refresh a blank document in Web Intelligence Applet interface or Web Intelligence Rich Client
2221811	It is possible to purge a blank document in Web Intelligence Applet interface or Web Intelligence Rich Client
2221965	Refreshing a document with Web Intelligence RESTful Web Service should accept but not require List Of Values parameters

2222534	In HTML viewer, document input control disappears if it is created on a dimension based on bex key and the option the allow null value selected
2223656	In HTML Viewer query panel universe outline, the option "display unique name" is not applied when creating a Web Intelligence report based on UNX universe
2224593	Incorrect values may be displayed if you are using report filters on a Web Intelligence report
2224635	Multiple space characters are replaced by a simple space character when a cell is set Read Content as Hyperlink in Web Intelligence
2226400	"Document as a Web Service" cache not cleaned when closing a Web Intelligence document (through Web Intelligence RESTful Web Service)
2228059	Web Intelligence should hide the position parameters of background images when they're useless
2228151	Web Intelligence Rich Client or HTML mode do not remove temporary empty directories when closed
2228676	When exporting a Web Intelligence report, having overlapping cells with texts, into excel format only the hinder cell will be shown in the exported .xls/.xlsx
2229291	Calculator regression on "In Report" context modifiers with variables and formulas in SAP BusinessObjects Business Intelligence platform 4.1 Support Package 06 Patch 3

## **SAP Crystal Reports 2016**

SAP Note Link	Description
2037542	Use formula to show description(s) of selected parameter value(s) in Crystal Reports 2016
2049726	The barcode font 'Free 3 of 9' cannot be displayed for Crystal Reports in the BI Launchpad when viewing in Internet Explorer 9 or higher versions.
2070456	Select the paper according to the customized PaperName instead of ENUM in ActiveX PrintControl
2071148	While viewing a Crystal report in web form viewer, text field does not get formatted according to the applied CSS class.
2072938	Business View Manager crash when adding a Filter in the Data Foundation
2073675	Unable to change the language setting in the Report Upload Wizard
2075414	Crystal Reports RAS SDK replace database connection fails on AIX
2076789	Error message "Please enter a positive whole number greater than or equal to the "From Page" field for the "To Page" field." is returned when schedule Crystal Reports to some format with page range entered.
2078444	Setting PrintOptions.PrinterName in Crystal Reports for Visual Studio causes a GPF in host application

2081048	Running .net application to view Crystal Report, it returns error: "The program can't start because cxlibw-5-0.dll is missing from your computer. Try reinstalling the program to fix this problem."
2081647	Crystal Reports page setup dialog becomes blank when setting Margins
2082521	Numeric Axis chart, background setting could not take effect in SDK exporting/printing/viewing
2084269	Main report is exported instead of subreport/group page after drilldown in .Net InfoView using ActiveX or Java Applet Viewer
2086784	Page truncated when viewing a report in Crystal Reports Viewer
2087538	View Crystal Report instance in Excel or word format in Internet Explorer, file name is displayed as view.do instead of report name
2087620	Space Between HTML Attribute and Value Causes Attribute To Be Ignored
2089155	Export Crystal Reports to xlsx format, the xlsx file could not be opened normally in office 2007 or older version.
2089179	Sort for null value in crystal report based off jdbc connection is different from order at database side.
2089221	Leading edge of object is chopping off parts of the characters
2090359	Cannot change No Printer to a Printer using .Net SDK
2091186	Add two APIs RevisionNumber and LastSavedBy to RAS .NET SDK &CR .NET SDK&Java SDK
2092265	Value contains apostrophe cannot be filtered out for crystal report based on universe connections
2092308	Crystal Reports returns incorrect results after upgrading from CR8
2092965	When exporting a report to CSV format, and setting a blank delimiter, Crystal Reports hangs
2094977	Clicking on up/down arrows twice will skip one month/year in Crystal Report Date Picker Calendar Control
2095619	A javascript error is thrown by the crystal report viewer if the browser window containing the prompt dialog is resized
2098714	Add Application Name property in OLE DB Provider in CR Database Wizard for MS SQL Server to customize the name when viewing in SQL Profiler
2102875	Tootip shows hyperlink in Winform viewer
2104747	Unknown Database Connector Error, When logining DB via Unmanaged/ Managed RAS for a HANA ODBC Report
2106006	Windows.Form Viewer - InitialFocus
2106298	Field names containing special characters such as "&" do not store in Publication Dynamic recipient report fields (Recipient Identifier, Full Name, Email)
2107630	Use Indexes for Speed not working in Crystal Report .NET SDK
2400272	Exporting Crystal reports to PDF from BI Launch Pad, Wingdings Font Characters are not displayed correctly
2109272	

2110044	Set crystal_use_asynchronous_request as false to view Crystal Reports using Java SDK, it still throws exception instead of writing it to specified log file.
2111292	Data sorted incorrectly in Crystal Report based off multiple data sources
2111311	Paragraph Line Spacing not retained before the first line when exported to PDF format from Crystal Reports
2111879	Unable to connect to Salesforce.com Sandbox from Crystal Reports
2115179	In Crystal Reports .NET SDK, no comments returned in reportdocument.RecordSelectionFormula
2115620	.NET dhtml viewer hangs when updating a parameter value on the parameter panel after exporting from the viewer
2115721	Add API HistoryInfos to RAS .NET SDK & CR .NET SDK to get the report history information
2121696	RAS About dialog copyright still displays "1998-2002"
2122217	RAS SDK has the limitation to insert more than 40 sections in one report area
2122725	Unable to show description for BW range and multiple variables in Crystal Reports
2123169	URL links in a Crystal Report to subreports generates an incorrect URL
2123290	Remove WSE 2.0 from Crystalreports designer installer
2123308	Can't print CR for Enterprise report from BI Launch Pad with ActiveX print control
2124434	Remove MSXML4.0 runtime from Crystal Reports installer
2125506	For Crystal Reports, optional parameter prompted repeatedly if no value was entered in .NET webForm viewer
2126631	Crystal Reports ReportApplicationServer stuck on high load
2127343	"Run Now" option appeared twice in context menu of Crysta Reports instance in IOMS history page.
2127366	Schedule Publication with Crystal Reports as dynamic recipients, you will find MissingResourceException from Adaptive Processing Server log file although it works well from UI.
2128430	"View Latest Instance" function didn't work for Crystal Reports document when the format of latest instance is not crystal reports.
2129593	View Crystal Reports in CMC or BI Launchpad using DHTML Viewer, Group tree cannot be expanded
2132655	Only up to 2000 rows of data can be displayed when reporting off a Salesforce.com Stored Procedure in Crystal Reports 2013
2133566	View Crystal Report using ActiveX Viewer in IE, OpenDocument doesn't work
2137810	Crystal Reports will automatically decode the URL which is used to display graph in OLE objects
2138420	Publication our of Crystal Report would fail due to child process crash when enable the trace of Job Server

2138455	View Crystal Report with saved data using RAS JAVA SDK, when change the parameter value of month, It returns error indicating fail to connect to database
2139376	While printing a crystal report from BI Launchpad, pop up box "Please wait while the Crystal Reports Print Control is loaded" keeps running
2140661	Create Crystal Report using Oracle Native driver off Oracle 12c Database with package body, error occurs "Failed to Retrieve data from the database."
2144095	Cannot search out text in group content after drilldown using web dhtml viewer to view crystal report without preview panel shown.
2144756	Hyperlinks are incorrect or missing when exporting a report from Crystal Reports to MS Excel Workbook Data-Only
2144958	Printer Tray selection is not respected
2147348	SFTP Destination
2154082	Add POC Print to WinForm Viewer Print Button
2154244	Application Exception Error occurred when refreshing a crystal report based off a stored procedure Universe in Crystal Reports 2013
2157589	Error: The time zone string is not valid, when refreshing a report in Crystal Reports on a French version of MS Windows
2158356	Section 120 limitation break for SDK
2158538	JSONException threw when viewing Crystal Reports with SDK
2162030	Summary title not diplayed correctly for PDF instances of Crystal Reports when scheduled through publication
2162455	Dynamic Parameter BrowseField value always returns null
2163429	Arabic characters with format align right in Crystal Reports are not aligned correctly when printed out usign ActiveX print control in BI Launchpad/CMC
2163607	Unable to create new reports on SAP data sources in Crystal Reports when SAP GUI 7.40 and NWBC 5.0 is installed on the same computer
2167277	CR .NET WPF Viewer API CrystalReportViewer1.PrintReport() does not work
2170407	The 'Data Access' rights set on the data connection in source for all the groups change to 'Denied' in the destination system after migration using UMT.
2171647	Incorrect date returned when connecting to a database using an OLE DB connection in Crystal Reports
2173729	The Unicode Prompt text becomes messy code after setting prompt value on prompt panel when viewing a Crystal Report in BI Launch Pad or CMC
2175614	Conditioal Formatting of Line/Box in Crystal Reports 2016
2177364	When viewing a report that contains a chart with a legend that has manually been positionned, the chart and Legend position change
2178224	Failed to print Crystal reports using PDF print control from CMC / BI Launchpad in IE/Firefox
2178572	Export to CSV with many unexpected (garbled) characters using BI 4.1 SDK

2178670	WPF Viewer will crash if click cancel button when saving print result to XPS file
2181679	Alignment issue for Oracle's DB type CLOB during export word/RTF format using Crystal Reports
2186240	Add API HistoryInfos to Java SDK to get the report history information
2188520	RAS.NET SDK: Set ConditionalFormula to EvaluateCondition&ResetCondition of RunningTotalField will cause messy code
2195603	Specified printer with back slash in the name cannot be retained when rescheduling a Crystal Report instance.
2196411	ReportApplicationServer crashed on Unix platform when viewing report from CR.Net webform viewer
2197717	Error in Formula no longer generates a valid .NET SDK error message when exporting the report
2200029	Enhancement in Crystal Reports RAS SDK to access CrGroupOptionsConditionFormulaTypeEnum.crGroupName
2201819	View Crystal Reports in BI LaunchPad using java dhtml viewer, selected button was not highlighted on left side bar
2204556	Crystal Reports dynamic lov is shared between sap users with row level security
2206757	Stop Report Application Server on Aix platform might cause core files generated from boe_crystalras
2207152	Failed to view crystal reports having ondemand subreports caption font color configured by formula in dhtml viewer.
2207250	Hyperlinks are incorrect when exporting a report from Crystal Reports to MS Excel Data-Only
2207300	When Strikeout and Underline are set at the same time, neither of them takes effect in .Net/Java Dhtml viewer
2209712	Paper Tray is not respected when using POC print in Windows Form app
2212976	Check() method for Condition Formula in RAS.Net
2214026	View a Crystal report with Formula on Unix platform using DHTML viewer, it is displayed incorrectly
2214341	Error: Failed to retrieve data from database, when refreshing a report in Crystal Reports based on a Stored Procedure Universe
2214343	In Crystal Report, when CheckBox "Suppress If Duplicated" is checked, some data in the detail section can't be exported as MS Excel Data-only
2216104	The schedule date parameter is shown incorrectly when choose value as 1900/1/1 0:00:00 for Crystal Report 2013

## **SAP Crystal Reports for Enterprise**

SAP Note Link	Description
2047046	Shared Variable displays no values in Crystal Reports for Enterprise
2057962	Crystal Reports for Enterprise Total Page Count and Page N of M does not work when viewing the report in BI LaunchPad or the Central Management Console
2074459	The prompt page for Crystal Report for Enterprise document is in English interface after applying Patch 4.2 for BI 4.1 SP4
2074982	Font reduced by 0.5 when exporting to MS Word or RTF format from Crystal Reports for Enterprise
2075426	Paragraph Line Spacing not retained when exporting a report from Crystal Reports for Enterprise to MS Word or RTF format
2077263	Missing dimension in the list of Result Objects of the Query Specification, mandatory because it is a BEx Structure
2079324	Text variable for key figures is not updated correctly when report is refreshed with same variable values in Crystal Report for Enterprise (CR4E)
2082350	Line position changes when exporting Crystal Report as word document
2082998	Linked Subreport based off Universe returns data in Crystal Reports for Enterprise 4.1, when the main report returns no data
2089474	False borders are displayed for Logos in BI Launchpad when Viewing/ Refreshing a (CR4E) Crystal Report
2092990	SAP Crystal Reports for Enterprise program is crashed when editting the default value for prompt which comes from the specific Bex query
2098526	RFC User Sessions are not closed in the BW backend after the refresh of the report in the Crystal Reports for Enterprise(Java Designer)
2102014	Text misaligned or truncated when exporting a report to PDF from Crystal Reports for Enterprise
2105919	Custom sql contains sum function return incorrect value in Crystal Reports for Enterprise
2107591	CR DHTML viewer - Horizontal scrollbar not available for group tree
2108130	CR Java applet viewer not truncate page footer goes partially outside the page
2108742	Data in the Crystal Reports Subreport of certain instances appear to display data from newer instances
2109191	Report does not display data for Selection option variable in CMC or BI launchpad for second refresh if last selected prompt values are used
2110131	Refreshing Crystal Reports from the the BI Launchpad is throwing error.
2111978	Crystal Reports for Enterprise designer crashes when adding formula in crosstab
2116200	Cross-tab summaries return zero, when exporting a report to MS Excel Data Only, or MS Excel Workbook from Crystal Reports for Enterprise
2116721	Crystal Reports for Enterprise reports not preserving number alignment when exported to PDF

2121695	Crystal Reports not recognizing Stored procedures column when Temp Tables are used
2125509	Error: org/apache/http/auth/Credentials (CRS 30003) occurs when scheduling a Crystal reports for Enterprise document with MSAS data source
2134307	Searching in Crystal Reports for Enterprise prompts is case sensitive in BI Lanuchpad while is not in the client application
2138310	CR4E: Unable to sort on x axis if using running total in chart
2148035	In CR4E, the NumericText and IsNumeric functions are not recognize the value formatted in scientific notation
2158670	Unable to open Crystal report from a parent crystal report when parameter is passed between the reports on iOS BO mobile app.
2162878	Unable to format Data Labels for each series on a Chart in Crystal Reports for Enterprise
2167122	JRC00004864 error happens and Crystal Reports for Enterprise crashes when saving the document
2169878	Support For CSV/Text Feature in CR4E
2176055	Fail to refresh saved data of a report containing a sort control after modifying the locale of the associated OLAP connection.
2176060	Error: "Exception in formula <formula name=""> at <field name="">: This field is not known" when viewing a report base on a BEx Query in BI LaunchPad</field></formula>
2183906	The "Prompts" scheduling property can not be set on Crystal Reports for Enterprise reports when the "Refresh the report data" access right has been denied.

## **Semantic Layer**

SAP Note Link	Description
2004319	Universe (UNX) folders names are not translated in Web Intelligence, which is visible when objects in different folders have the same name
2013470	Operator of type 'Matches Pattern'/ Like predicate are not supported for TEXT columns coming from HANA databases
2017473	Incorrect @prompt definition getting generated for objects when LOV's are not associated
2039334	Mapping tables in a Data Security Profile generates wrong SQL for connectivities that do not use double quote as a delimiter
2049725	After export, User and Group Access Right on a copied universe turns to "No Access".
2054795	Incorrect automatic generation of SAP BW data foundation/business layer when multiple cubes containing identical table names are involved
2058538	IDT fails to recoganize upper case schema name when check integrity

2060126	Addition of configuration files mechanism in DSL to customize BICS behaviors
2063850	Crystal Report from a Universe (UNX) based on SAP ERP duplicates parameter when migrated from BI 4.0 to BI 4.1
2065365	Invalid prompt definition IES 00005 with Allow multiple values parameter in Information Design Tool
2065461	Unable to save a datafoundation using the SDK if the DataFoundation has an alias table that points to a table that was added AFTER the alias was created
2071989	Dashboard Xcelsius Does Not Show Members In Hierarchy
2072040	MultiTenancy Management Tool (MTM) failed with error (MTM 00011) when connection uses 'DatabaseMapping' authentication mode
2072188	There are several performance issues for displaying Datafoundation editor.
2073555	Measures become dimensions in Webi Intelligence Rich Client
2074507	Function "BETWEEN" is incorrectly used in the SQL when using Hadoop database and Hive middleware
2074589	BI4.x :Comment box in Information Design Tool cannot be resized instead it gets dragged
2074719	BI4.1 : Change source generates error: "index=1 , size=1 (WIS 00000)"
2074786	IDT DFX : Tables, views, and synonyms are not displayed alphabetically in the Connection pane
2074979	Circular references error happens for cascading LOV based on HANA View which has variables in Information Designer Tool
2076658	XLS 000009 error and performance issues
2077181	In a Web Intelligence document based on BICS connectivity, the hierarchy nodes are sorted differently from the BEx query
2077355	Universe Design Tool: The control settings in the universe does not allow to edit Limit size of result set rows.
2078609	Searching a value by its key from a List Of Values in Web Intelligence takes abnormal duration
2078817	"Query script generation failed. See your administrator. Object disposed (IES 00013)" error intermittently thrown while refreshing Dashboard based on web services created within Web Intelligence
2079158	"Connection.count" property of universe designer COM SDK increases session count by 2.
2081480	Information Design Tools / OLAP Business Layer : Deleting BusinessItem and regenerating with RefreshStructure fails
2082022	IDT 4.1 freeze after retrieving universe
2083866	Retrieve empty rows property not correctly working for Web Intelligence report based on MSAS Cube
2084578	SQL Generation differences between BI 4.0 SP4 Patch 5 and BI 4.1 SP4 Patch 4 regarding usage of right join in the From clause
2085952	BI4.1: When the owner name contains any special character, a single quote (') is automatically added to the database owner name.

2086388	@Varaible('DBUSER') function is completed in Information Design Tools
2088165	DSN detail not available after install
2000100	List Of Values based on custom hierarchy points to the previous database
2088925	after updating the qualifier on all the tables manually
2091048	Using a "Database delegated" Measure and a Dimension with @Prompt defined in the Where clause at the universe level returns incorrect results in Web Intelligence reports when a Sum is applied
2091632	Failed to Update the Connection BICS
2093223	Unable to add a new connection to an existing multisource Universe using Semantic Layer Java SDK
2096115	BI4.1: In Information Design Tool derived tables are not being updated automatically on Refresh Structure action
2097448	Problem in SemanticLayer when a BEx Query contains a Characteristic with a Hierarchy selected for display but not active
2098068	Error: Data type is incompatible with data: 'You cannot convert Bit into Numeric.' when attempting to create a new report in Crystal Reports for Enterprise
2098305	BI4.1 : "Circular references: check the references to other business layer objects in the expression. (IES 01003)" when running query with changed Rank filter class
2098344	Sessions leaks leads to production down
2098475	SH Serbian Latin language is not being acknowledged in OLAP BICS connection used with Web Intelligence
2098594	Dashboards query browser may freeze when loading UNX universe
2099992	Parameter CLEAN_UNIVERSE does not work correctly
2101215	Running a dashboard created in Design Studio based on a combined query on a universe, supposed to display a crosstab fails in Web
2105510	On second refresh, data for penultimate refresh is seen with a complex technical message from backend
2106328	Crystal Report for Enterprise document on Bex Query cannot be executed
2107241	XIR3.x : Joins missing in WebIntelligence Infoview and WebIntelligence Rich Client SQL generation
2108706	BI4.x:Concat format used is double pipe $  $ in sub queries whereas the desired format is comma ,
2113504	Wrong information pop-up in UMT
2114154	Free typing for change table owner in Multi Source Universe in Information Design Tool causes the Check Integrity of joins to fail
2114650	Table Mapping restriction applied to subgroup is impacted by other group which has no relationship with it
2114827	Parsing object with @Select and aggregate aware freezes Information Design Tool
2116526	Business Layer parameter cannot be used in reports to show timestamp
2117792	Different behavior and SQL generation is noticed for "Shortcut_behavior" in Information Design Tool as on Universe Design Tool when set to GLOBAL

2121250	BI 4.1 sp04 : Missing measure values at intermediate levels of hierarchy.
2122755	Error occurs when run query if the query contains dimension object with ROW_NUMBER function and sum measure object
2123353	The CRServer process crashes when opening, saving or exporting a Crystal Report based on a .unv universe that has restrictions
2126542	Custom SQL with Insert statement is not validating when migrating Web Intelligence reports from XI 3.1 to BI 4.1
2130675	Cannot rename a standard table if another standard table with the same name but different owner/qualifier is already present in the data foundation
2141615	Server Intelligence Agent (SIA) shows it cannot find dsl_slproxy.pdb.config file after upgrade to SAP BusinessObjects Business Intelligence Platform 4.1 SP04
2144336	Prompt values displayed horizontally in prompt box rather than vertically if the user has default values assigned to BEx variables based on their authorization
2146966	ADUser appended with copy(1)
2149018	IDT Error The context in Data foundation Contains An Excluded Join That Generates A Cartesian Product
2150533	Web Intelligence reports with multiple BW sources causes STS to fail
2150534	The error "Query script generation failed. See your BusinessObjects administrator. No member found for Caption ' <member>' in Characteristic '<characteristic>'.(IES 00013) (WIS 00000)" appears when searching for a value within a Web Intelligence prompt</characteristic></member>
2151668	In Web Intelligence, an error occurs when manually input same prompt value as value shows in List Of Values
2153909	Authorisation values with escape/char(2)
2155600	An error "The query cannot run because it contains objects that reference incompatible tables. (IES 00008)" occurs when parsing object in Information Design Tool
2159873	Web Intelligence Unsupported authentication mode (Kerberos): GSS Provider not available
2160692	Garbled character is found in the move universe dialog in CMC when the product locale is set as Japanese
2161297	Incorrect Web Intelligence SQL is being generated and does not reflect some of the access restrictions applied at universe (UNV) level
2164195	The complex filter or multi-filters defined in the Business Security Profile will result for the Web Intelligence document to run endlessly
2164995	An error is occuring when using OLAP connection that is wet with use a language not installed on BW system
2167066	IDT Business Layer Same Schema Table and Column Name Errors In Query
2168621	Error "A filter contains a wrong value. You cannot run this query. (IES 00007) (Error:INF)" is occuring when using a universe containing Business Security Profile to restrict access to a class
2173850	SDK tool to auto change our BW unv

2176239	Prompt can't accept more than 99 values if universe is generated by Semantic Layer SDK
2176687	Can't clear AssociatedDimension COM
2177836	When refreshing a Web Intelligence report that contains a DateTime prompt based on a custom List of Values defined in the Business Layer, an error is observed
2180555	Potential information disclosure relating to BusinessObjects Semantic Layer SDK
2180593	Hive JDBC driver : OWNER not added in table name
2180664	Universe comments are arranged at left after converting Universe in Information Design tool
2182569	Extra tables are lost when a native filter is updated
2183592	"The query cannot run because it contains objects that reference incompatible tables. (IES 00008)" when running query in Information Design Tool
2184675	Web Intelligence report based on BICS connection gives an error on the first refresh and works on the following
2185369	Web Intelligence selects the wrong context query and generates an incorrect SQL statement on SAP BusinessObjects Enterprise XI 3.1 Service Pack 6 or Higher
2185784	BI4.1: When refreshing two Webl reports against different BW systems, the Safety Belt parameter is incorrectly being applied to the wrong BW System
2188065	In Information Design Tool an error message "unresolved references (IES 01011)" occurs when applying a function on an object including comma in the name
2188529	Keywords in Crystal Reports documents are not migrated from SAP BusinessObjects Enterprise Platform XI 3.1
2190414	IDT Change Derived Table With Alias Drops the Joins
2193962	The error "Query script generation failed. See your administrator. No member found for Caption 'COMMUNCATIONS' in Characteristic 'Job Function' (IES 00013)(Error: INF)" appears when searching for a value within a Web Intelligence prompt
2194138	All values for both leaf and node are returned when selecting only a leaf value from hierarchy prompt. Node values should not be included in the result.
2196908	Optional Web Intelligence prompt are showing as mandatory when report is being run
2197441	Migration error for universe connection using UMT tool-CCIS
2202804	The SQL generated in a Web Intelligence document is different in SAP BusinessObjects Business Intelligence platform 4.1 than it was in SAP BusinessObjects Enterprise XI 3.1
2209955	Context Selection window does not comes up in Information Design Tool

## **Translation Management Tool**

SAP Note Link	Description
2095006	Web Intelligence incorrectly resolving to wrong version of language after translating in Translation Manager Tool
