# 1 Deep Links

A deep link is a hyperlink that links directly to a specific page in the SAP SuccessFactors system, rather than the start page.

Deep links can be used anywhere hyperlinks are possible. You can use them in offline content, such as your internal documentation, or on intranet sites, like your company portal. They can also be used in third-party applications, such as extensions built on the SAP Cloud Platform. You can even use deep links within the SAP SuccessFactors system itself, such as on the home page, in the main navigation menu, or on the employee profile.

## URL Parameters for Deep Links

You can add parameters to the URL for some deep links, containing additional data. For example, the following deep link specifies the user whose Personal Information page to link to:

### ❁ Example

```
https://performancemanager4.successfactors.com/sf/personalinfo?selecteduser=jsmith1
```

### i Note

Parameters allow a third-party application or extension to dynamically insert a specified user into the deep link URL. If you add the a deep link to the user interface using the Custom Navigation tool, you can use a URL token to inser the user parameter.

## 2 Creating a Deep Link

Create a deep link that you can use to hyperlink to a specific page in the SAP SuccessFactors system.

### Procedure

1. Determine the base URL used in the system. The base URL varies by customer and region.

#### ❖ Example

Here's an example of a typical base URL.

```
https://performancemanager4.successfactors.com.
```

2. Add a deep link path to the base URL, separated by one forward slash (/).

This example links to the logged-in user's development plan.

```
https://performancemanager4.successfactors.com/sf/devplan
```

3. Add a question mark (?) separator to the end of the deep link path, followed by a supported URL parameter, as a name-value pair.

#### ❖ Example

This example links to the Personal Information section of the employee profile for user ID jsmith123.

```
https://performancemanager4.successfactors.com/sf/personalinfo?  
selecteduser=jsmith1234
```

4. Separate multiple parameters with an ampersand (&).

#### ❖ Example

This example links to the performance review form for user ID jsmith123 and for form ID 4567.

```
https://performancemanager4.successfactors.com/sf/pmreview?  
username=jsmith123&fid=4567
```

5. Insert the deep link URL as a hyperlink in the desired location.

# 3 List of SAP SuccessFactors Deep Link Paths

You can use these URL paths and parameters to create a deep link to SAP SuccessFactors.

## ❁ Example

- Add a deep link path after the base URL, separated by a forward slash (/): `https://performancemanager4.successfactors.com/sf/devplan`
- Add a parameter, if needed, after the deep link path, separated by a question mark (?): `https://performancemanager4.successfactors.com/sf/personalinfo?selecteduser=jsmith1234`
- Add multiple parameters, if needed, separated by an ampersand (&): `https://performancemanager4.successfactors.com/sf/pmreview?username=jsmith&fid=1234`
