1 About This Document

This document describes the features that are available in SAP Translation Hub.

The availability of some of them may depend on your license agreement with SAP. To illustrate integration with other SAP offerings, the product documentation on the SAP Help Portal might include references to features that aren't included with SAP Translation Hub. Features that are not included in this feature scope description require a separate license.

2 Introduction

SAP Translation Hub enables you to translate texts by using APIs or integrated translation workflow scenarios to access records in a multilingual database and by using machine translation.

This feature scope description provides a high-level list of the features that are available with SAP Translation Hub.

i Note

This document does not include any information about the scope of beta features available for SAP Translation Hub. Beta features are described in the documentation for the relevant beta feature.

3 Features

SAP Translation Hub enables you to translate texts that are stored in different systems and repositories. This section provides a high-level description of the available features.

Feature	Description
Translate texts using multiple translation providers	<p>Translate texts in the languages that SAP Translation Hub supports by using multiple translation providers:</p> <ul style="list-style-type: none">• A multilingual text repository (MLTR) that contains translations verified by language specialists and official SAP terminology• A machine translation solution that was trained on translations that were verified by SAP-certified language experts• A company multilingual text repository (company MLTR) that contains your own language data <p>For more information, see the entry for integrating your own language data in this table.</p>
Consume APIs	<p>Use the features of SAP Translation Hub in other applications by consuming a range of APIs. The APIs are as follows:</p> <ul style="list-style-type: none">• domains• languages• suggestions• texttypes• translate
Integrate in selected SAP products	<p>Translate texts relevant for translation directly from development projects in SAP Web IDE and from workspaces in SAP Business ByDesign.</p>
View quality rating	<p>Estimate the quality of translations that SAP Translation Hub provides. The higher the number on a scale from 0-100, the better the quality. The quality index is part of the UI for translation projects and the response of the <code>translate</code> API.</p>
Manage translation projects on a UI	<p>Perform the following tasks on a single UI:</p> <ul style="list-style-type: none">• Get translations for texts that originate in multiple sources• Check translations and filter according to criteria such as the translation provider or quality index• Post-edit and review translations, and set a corresponding status
Integrate your own language data	<p>Integrate language data that is specific to your company or the industry in which your company has operations. By integrating your own language data, you can increase the quality of translations and reduce the effort required to post-edit and review translations.</p>

4 Product Availability

This section describes the product availability aspects and the product restrictions.

Availability Aspect	Description
Platform availability	<ul style="list-style-type: none">• Latency: network latency depends on various factors; no precise information can be provided on a general level• Resilience: the system can regain a stable state after disruption• Scalability: the system responds to peaks in resource requirements, for example• Extensibility: the system can integrate other technologies
Regions	SAP Translation Hub is hosted in different regions (see SAP Cloud Platform Regions and Service Portfolio and filter by <i>SAP Translation Hub</i> in the <i>Service Name</i> column).
Environments	SAP Translation Hub is available in the Neo environment.
Languages	The UIs for SAP Translation Hub are available in the following languages: <ul style="list-style-type: none">• Chinese• English• French• German• Japanese• Portuguese• Russian• Spanish
Accessibility	SAP Translation Hub provides accessibility support in its administration and development tools, and the customer documentation. This includes: <ul style="list-style-type: none">• Texts and information• UI elements via attributes and element IDs• Orientation and navigation throughout the UI• User interaction
Integration	<ul style="list-style-type: none">• Integrates with other SAP or third-party cloud products and platforms• Includes a comprehensive set of services for connectivity and integration with your cloud-based applications• Facilitates secure integration with on-premise systems running software from SAP and other vendors
Free trial use	You can use SAP Translation Hub with a free trial account on SAP Cloud Platform for testing and exploring; you are not allowed to use the free trial productively.

Restrictions

- Operations support for applications running in EU regions can be performed only by operators located in the EU.
- Upload limit: an application deployed on SAP Cloud Platform can be up to 1.5 GB. If the application is packaged as a `.war` file, the size of the unzipped content is taken into account.

i Note

Further restrictions may apply when using the product on an infrastructure hosted by a third-party provider.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Gender-Related Language

We try not to use gender-specific word forms and formulations. As appropriate for context and readability, SAP may use masculine word forms to refer to all genders.
