

# SAP Agency Cloud Edition (ACE) Quick Start Guide

This guide describes how to create and configure ACE accounts to be used for Work Manager or Inventory Manager. There are four accounts required for users that have a production-level license, created by following the steps described below and using the Global Account. There are two accounts available in the **Mobile Services Preview** landscape and two accounts available in the **Mobile Services Provider** account. All other license levels will not have access to the **Mobile Service Provider** account and will only have access to the **Customer Dev** account and **Customer Preview** account.

## Setting up the ACE landscape

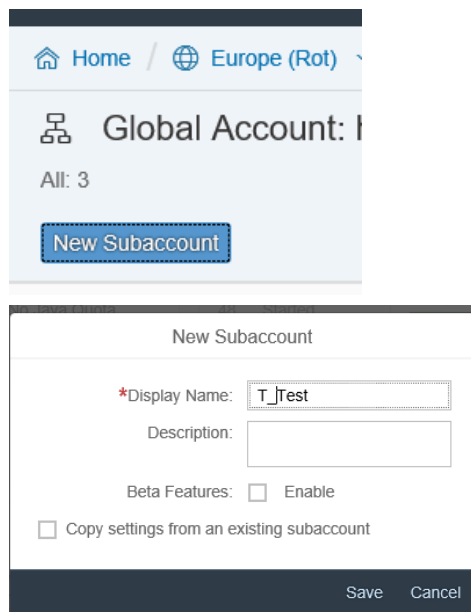

After the customer has placed their initial order and the request has been processed, they will receive access to their Global Account. This will consist of a specific URL to their SAP Cloud Platform Cockpit account, which includes the data center where the Global Account is located.

### Create “New Subaccount”

**NOTE: The following steps will be performed by the customer in a self-serve mode by the Administrator of the Global Account.**

#### Step 1: Create customer: “New Subaccounts”

- a. Using the URL for the Global Account, access the Global Account in the SAP Cloud Platform Cockpit
- b. Click **New Subaccount**.

The image shows two screenshots from the SAP Cloud Platform Cockpit. The top screenshot displays the 'Global Account' page with a 'New Subaccount' button highlighted. The bottom screenshot shows the 'New Subaccount' dialog box with the following fields and options:

- \*Display Name:
- Description:
- Beta Features:  Enable
- Copy settings from an existing subaccount
- Buttons: Save, Cancel

**Note: Steps 1,2,3,4,5,6 will be repeated for each subaccount that you create.**

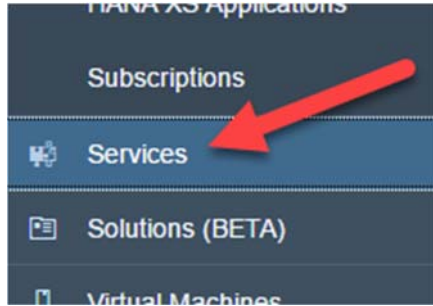

- c. Assign a Premium Plus edition (prem-plus) compute unit (for the Development account only – this step is not required for Preview, Test, or Production accounts and subaccounts). See <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/7612fbaf711e1014839a8273b0e91070.html> for additional information.

#### Step 2: Enable the Agency Service tile for the Subaccount created in Step 1

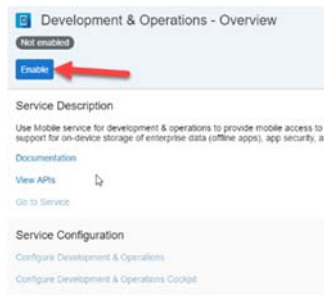

- a. With the newly created Subaccount open in the Cloud Platform Cockpit, select **Services** (from the drop-down menu on the left).
- b. From the **Services** list, search for **Agency**.
- c. Click **Agency** to display the page.
- d. Click **Enable** to enable the Agency Service within the SAP Cloud Platform Cockpit page.

### Step 3: Enable the mobile service for development and operations Preview Service

- a. In the SAP Cloud Platform Cockpit page, select **Services**.

- b. Select **Mobile Services**.
- c. Select the **Development & Operations Preview** tile if the Agency Subaccount is used for **Development** or **Preview** accounts, otherwise select the **Development & Operations** tile if the Agency Subaccount is for **Test** or **Production** usage (this option is only available for production-level licenses).
- d. Click **Enable**.

### Step 4: Configure Admin rights in “Mobile Services”

- a. Under **Service Configuration**, click the **Configure Development and Operations** link.
- b. Navigate to the **Roles** option.

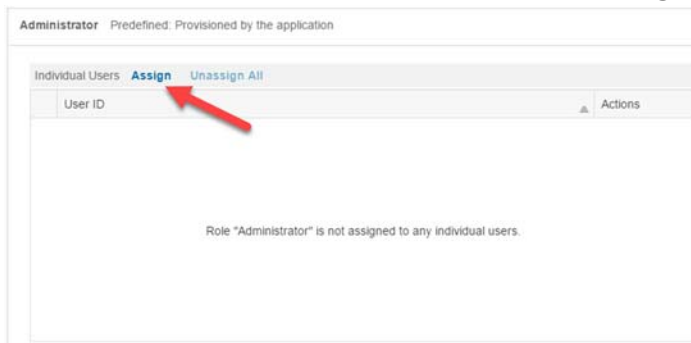

- c. From the **Roles** list, select **Administrator**.

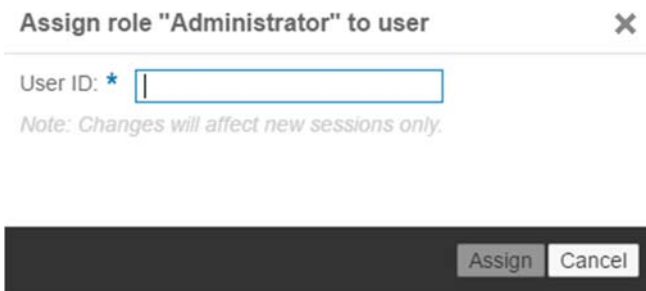

Roles (All: 9)

New Role	
Name	Type
Helpdesk	Predefined
Editor	Predefined
Administrator	Predefined
Impersonator	Predefined
AdminImpersonator	Predefined

- d. In the **Administrator** list for **Individual Users**, click **Assign**.

- e. Enter your User ID in the field and click **Assign**.

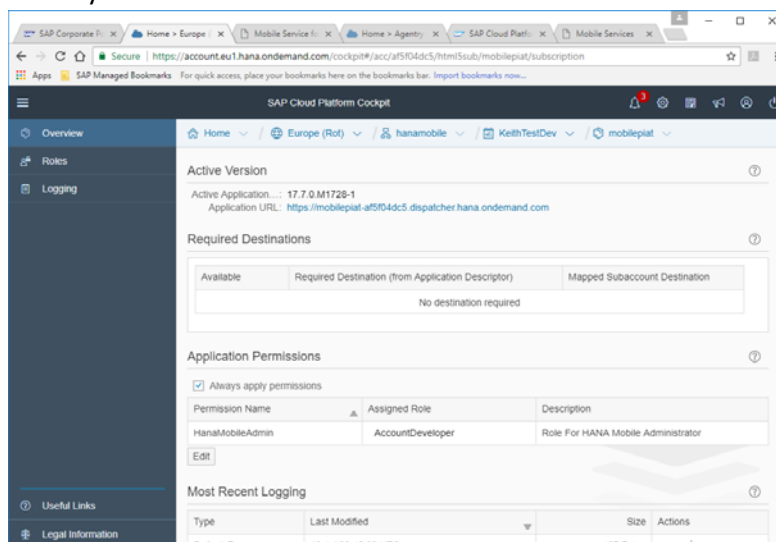

**Note:** Any user that needs to access the Sample OData Service is restricted to the Developer role and the Administrator role. If a user is not assigned to one of these roles, they will be unable to access the Sample Service.

- f. Click the **Development & Operations** link to return to the service overview.

### Step 5: Launch Mobile Services Admin UI

- In the SAP Cloud Platform Cockpit, select **Services**.
- Select **Mobile Services > Development & Operations Preview** tile or **Development & Operations** tile.
- Select your account.

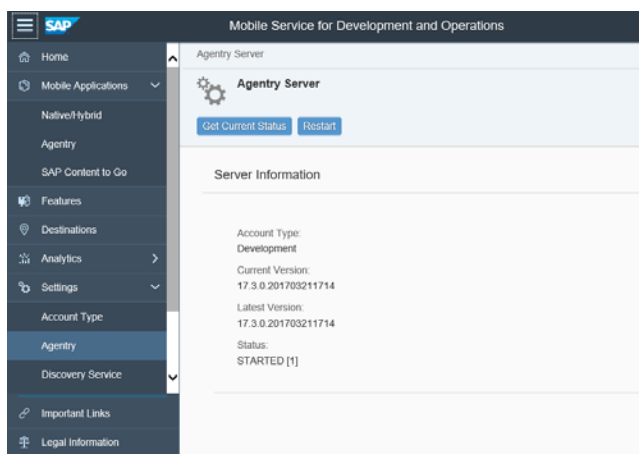

## Step 6: Provision the Agentry account

- a. In the cockpit, select **Settings > Agentry**.
- b. Select **Provision**, which is available only if the account hasn't yet been provisioned. Once you've provisioned the account, **Restart** and **Upgrade** options also become available.
- c. Enter the user name and password.
- d. Select the landscape.

**Note:** If this is a **Development** account, use **Admin credentials**, which calls the **ACE PROMO provisioning API**.

- e. Select **Proceed**.
- f. Verify the server information by selecting **Get Current Status**, which will show the account type and current version.

## Step 7: Deploy Work Manager in the ACE Development Environment

- a. **Install and configure the SAP HANA Cloud Connector:**
