# 1 SAP Sustainability Footprint Management

SAP Sustainability Footprint Management is a solution that allows you to calculate corporate and product footprints along with the transport footprints. By using the extracted data from your business systems, combined with the emissions of your purchased products and the energy flow models of your company, the solution enables you to calculate and assess the footprints for all the relevant activities in your company.

## 2 Document History

### Caution

Make sure you have the latest version of this document. You can find the latest version at the following location: <https://help.sap.com/docs/sustainability-footprint-management>

The following table provides an overview of changes to this document.

Version	Date (YYYY-MM-DD)	Description
1.0	2023-05-16	First version
1.1	2025-07-09	Minor changes
1.2	2025-07-23	Minor changes

# 3 About This Document

This feature scope description shows you which features are provided with SAP Sustainability Footprint Management. In addition, this feature scope description also defines the product documentation, as defined in the SAP Terms and Conditions.

## Licenses

Note that for certain features you might need a separate subscription license. For further information, please contact your SAP Account Executive.

## Integration

SAP Sustainability Footprint Management supports integration with other SAP products. Please note the following:

- Other products mentioned in this feature scope description might have their own product life cycle, localization versions, or language scope, and are therefore named only as an example or as currently integrated.
- Integration with other products might be subject to a change with the next release of SAP Sustainability Footprint Management.
- You might need an additional license for other products.

For further information, please contact your SAP Account Executive.

# 4 Key Features

The following table explains the key features available:

Key Feature	Description
Integrate with supported business systems	Integrate with business systems (for example SAP S/4HANA Cloud Public Edition) to import your business data.
Import emission data	Bring emission data for your purchased products into the solution from sources like the Life Cycle Assessment (LCA) databases or your suppliers.
Model energy flows	Model the energy flows in your production. This information is then used to allocate monthly energy consumption to the manufactured products.
Add data for any GHG category at location level via form-based data collection	Set up the form-based collection of data at location level for any GHG category. With form-based data collection, users across your organization can enter GHG data in forms, and that data can be included in your footprint calculations.
Calculate carbon footprints and other impact categories, and view results	<p>Calculate periodic organizational footprint inventories and product footprints by using the imported business data and emission data like those for purchased products and the modeled energy flows. You can also import a snapshot of your source data with a template and calculate footprints for this data.</p> <p>View the results of all the calculations performed by navigating through the calculated footprint inventory and identify the footprint items in the value chain with the highest contributions.</p>
Publish footprint information	Publish footprint information to your business systems (such as SAP S/4HANA or SAP S/4HANA Cloud Public Edition). For further information on the supported business system versions, contact your SAP Account Executive.
Perform footprint analytics	Get actionable insights into your company's main footprint drivers by leveraging the analytics reports provided by the solution.
Calculate transport footprints	Calculate transport footprints and view results.

# Important Disclaimers and Legal Information

## Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
  - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.

- Links with the icon : You are leaving the documentation for that particular SAP product or service and are entering an SAP-hosted Web site. By using such links, you agree that (unless expressly stated otherwise in your agreements with SAP) you may not infer any product claims against SAP based on this information.

## Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

## Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

## Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

## Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
