Notes related to security corrections will not be listed in this release note. Information on relevant security corrections can be found in the SAP Support Portal within the Security Patch Day section.

Fixed Issues for SAP BusinessObjects Business Intelligence Suite 4.2 Support Package 06 Patch 01

BI-BIP-ACP

SAP Note #	SAP Note Text
0002590530	Double bytes characters are corrupted in the exported csv file from BI Administrator's Cockpit

BI-BIP-ADC

SAP Note #	SAP Note Text
0002669775	If Rest Services is deployed on non-web application container server(wacs) environment, Save Scenario or save workflow template does not work.

BI-BIP-INS

SAP Note #	SAP Note Text
0002677842	Cannot Connect to a Remote CMS when Installing or Updating to 4.2 SP06 BIPlatformServer

BI-BIP-LO

SAP Note #	SAP Note Text
0002622736	User is allowed to see and query on unauthorized universes (.UNX) in Live Office
0002627662	In SAP BusinessObjects Live Office, you can't refresh queries based on universe without the granted "Create and edit queries based on the universe" security right
0002647068	Multiple tables in a Live Office document show the same prompt values instead of each one showing different values
0002649710	When importing a chart into live office from a webi report with the “refresh on open” option enabled, the block is empty.

BI-RA-WBI-FE-FIO

SAP Note #	SAP Note Text
0002654968	The last value in a prompt range list is not visible when using the Web Intelligence Interactive Viewer
0002663362	⌘;Error (WSR 00400)⌘; error message appears when folding or unfolding a section based on a Time Dimension in Web Intelligence Interactive Viewer
0002663386	Memory consumption of the internet browser keeps increasing when using the Auto refresh feature in Web Intelligence Interactive Viewer
0002666140	When using Open document with Web Intelligence Interactive Viewer, the report is empty if optional prompts are filled with empty value
0002670451	The navigation map may not be properly updated after changing an Input Control value in Web Intelligence Interactive Viewer
0002672886	Opendoc URL should support both 'light' or 'Light' option for sReportMode parameter in Web Intelligence Interactive Viewer

SAP BusinessObjects Analysis, edition for OLAP

SAP Note #	SAP Note Text
0002655966	OLAP - Saving Warning Missing
0002667116	Error when drilling a Hierarchy in Analysis edition for OLAP when Hierarchy name has special character
0002668463	OLAP Connection page in Central Management Console is broken for SAP BW connections to Message Server
0002675890	Search in list of members is disabled when Member Selector is loaded from Prompt panel
0002677381	Loading OLAP Connections page in Central Management Console takes long time

SAP BusinessObjects BI Workspaces

SAP Note #	SAP Note Text
0002676094	[CVE-2018-2479] Cross-site Scripting vulnerability in BIWorkspace
0002677306	Compound module returns HTTP 404 error

SAP BusinessObjects Business Intelligence platform

SAP Note #	SAP Note Text
0002624447	BI launch pad group preferences do not get promoted if group already exists in destination
0002647714	[CVE-2018-2483] HTTP Verb Tampering vulnerability in SAP BI CMC
0002650181	Limits on Inboxes do not delete oldest to newest
0002650813	BI Product Version not updated correctly in SLD/LMDB
0002653089	False message: "You must restart the server for changes to take effect" for Audit Database Connection property of Central Management Server.
0002660390	Scheduling TEXT file to SFTP via Fiorified BILaunchpad gives invalid credentials error.
0002664465	Audit files are not inserted in Audit Database -BI4
0002667379	SSL Certificate generator GenPSE.exe forces the use of email address
0002667386	Improve performance of loading aliases to assign to a user account
0002667994	Improve performance of synchronizing Users and Aliases for Third Party authentication plugins
0002671357	Many errors in logs of Central Management Server when synchronizing Third Party user accounts with email import enabled
0002673686	Improve performance when navigating in folders with many elements
0002675353	Central Management Server returns incorrect estimated result size when query has "order by" specified

SAP BusinessObjects Dashboard Design

SAP Note #	SAP Note Text
0002671775	In SAP Dashboards, BEx description is not displayed on Query Browser
0002676108	A square is displayed as mouse shadow when running a dashboard in BI launch with Internet Explorer

SAP BusinessObjects Explorer

SAP Note #	SAP Note Text
0002671327	SAP Business Objects Explorer index folder is growing dramatically
0002671597	SAP Business Objects Explorer Statistics Calculation Failed

SAP BusinessObjects Information Design Tool

SAP Note #	SAP Note Text
0002607845	In Information Design Tool, for Oracle EBS connection wizard, the list of values for Language, Application, Responsibility, Security Group are not getting filled
0002626052	Navigation aggregation applied on tables coming from Core Universe in Universe Designer is lost in converted Universe in Information Design Tool
0002653612	After setting EnableJNI parameter from Yes to NO, Web Intelligence reports top of cms db universe fails with error
0002654045	IOException - UnsupportedCharset, is thrown while trying to create JDBC connection for Sybase IQ 16.1

SAP BusinessObjects Report Conversion Tool

SAP Note #	SAP Note Text
0002640220	'Error in Web Intelligence server' error appears after converting a DeskI report which has sub-reports in Report Conversion Tool

SAP BusinessObjects Semantic Layer

SAP Note #	SAP Note Text
0002604142	Error "An internal error occurred while calling 'processDPCommandsEx' API. (Error: ERR_WIS_30270)(Error: INF)" is shown when running a Web Intelligence report having an Attribute (Detail) object based on a calculated column in HANA
0002606299	Not able to get Web Intelligence document refreshed after upgrade to Business Intelligence Platform 4.2 SP05 - When clicking on refresh, the document refreshes endlessly
0002608661	An error "missing cube name" may appear when refreshing a "Saved As..." Web Intelligence report based on a BICS connection with BW variable
0002620914	Error appears while refreshing List of values in a Web Intelligence report based on HANA
0002625298	'DBSRetryableErrors: Failed to execute runnable (com.sap.tools.commons.exception.NestedException..' error appears in Information Design Tool when clicking on 'Detect row count' button
0002625728	CentralManagementServer sessions are not released correctly when using a SAP Single Sign-On connection
0002633101	Manually enter a dash character in a prompt is not working as expected in Web Intelligence
0002661756	A message "Universe generation failed for resource id ..." may occur when refreshing Web Intelligence document based on BICS connection
0002666724	Blank cells appear when refreshing Web Intelligence documents based on BICS connections.

SAP BusinessObjects Web Intelligence

SAP Note #	SAP Note Text
0002441642	Cannot select universe with Hebrew name by typing its 1st letter in Web Intelligence HTML interface
0002520665	Prompt order in Web Intelligence document is disrupted after adding a new prompt into query panel in Web Intelligence HTML interface
0002524116	The initial List of Values position should be always from the top of the list in a Web Intelligence report
0002577009	In the Web Intelligence HTML editor, Date and Datetime Dimension objects are not compatible in the "Result from another query" Query Filter
0002585837	Error: "An internal error occurred while calling the 'answerPromptLov' API. (Error: ERR_WIS_30720)" when refreshing Web Intelligence document created on HANA view containing optional variable without default value
0002592640	Charts and images are not displayed in Web Intelligence Interactive Viewer when using a reverse proxy
0002603061	WebIntelligenceProcessingServer server may unexpected shutdown or no value may be shown in the table for alerter based on variable formula
0002605500	Web Intelligence Dynamic Recipient List in a Publication shows incorrect dates
0002609137	Latitude and longitude values disappear from geo-qualified dimension after a refresh in a Web Intelligence report based on a BEx query
0002609569	When changing source of a unx-based report to something else, the Web Intelligence HTML panel get stacked in loading and universe selection is impossible
0002611778	When adding a query filter from a migrated universe with a cascading list of values in Web Intelligence it throws an error
0002620493	BW range variable is displayed incorrectly within the prompts section of a publication
0002624304	Empty values are shown in a Web Intelligence report table with Top N ranking on a multiple dataprovider document
0002628522	"Query script generation failed. See your administrator. Inconsistent answers. BW system <SID> returns Value '<VALUE>' for variable <VARIABLE> is invalid (IES 00013)" error is shown when using "Not Equal to" symbol for BEX variables
0002628558	Custom sort is lost after changing the data sources of Web Intelligence document using Web Intelligence RESTful Web Service
0002630692	Error "Cannot Drop here. The object is incompatible.” is displayed when trying to add measure objects in a table of a Web Intelligence report
0002632051	Error "Cannot build the query or generate the report (WIS 30351)" when editing data provider in Web Intelligence HTML mode
0002632785	Numeric values are converted to scientific notation in the SQL being passed by the Web Intelligence applet Interface and Web Intelligence Rich Client
0002632969	In Web Intelligence, the Fold/Unfold functionality does not work as expected when "Section" cells are hidden or deleted
0002637231	The message "The Server memory is full. WIS 30280 Error INF" is seen when exporting a Web Intelligence document to Excel or Portable Document Format
0002648214	WebIntelligenceProcessingServer server crashes due to AdaptiveProcessingServer server out of memory

0002648479	Error: "com.businessobjects.mds.olap.protocol.bics.BICSEException:com.sap.ip.bi.base.exception.BIBaseRuntimeException: Error: Provider Selection Object Initialization Issue" when trying to retrieve the List Of Values in Web Intelligence document based on Bics connection with Merge prompts
0002648775	No data is returned from a web service published from a Web Intelligence document when filtering data on a variable
0002649375	Vertical Relative Position of a report table is not adjusted according to the settings in Web Intelligence
0002651154	Error: "There is an error in XML document (xx,xx)" is displayed when selecting a UNV universe via Live Office
0002651313	The Web Intelligence HTML interface is not fully visible when editing or creating a document with Right-to-Left direction in Google Chrome
0002651452	Duplicating Web Intelligence query based on HANA OLAP connection causes error '257'
0002651724	BusinessLayerItem's id is null (Error: INF)" error when trying to change datasource for a Web Intelligence document to a specific universe
0002651872	"An internal error occurred while calling the 'answerPromptLov' API. (Error: ERR_WIS_30720)" error message appears when refreshing the lists of values for a prompt in Web Intelligence
0002652258	Web Intelligence report that contains a free standing cell cannot be published
0002652388	The message "No values to display" or "(--No Values--)" appears in the Query Filter "List of values" window within Web Intelligence documents
0002654400	No comment indicator shown after inserting a comment in a Web Intelligence report
0002654563	Disappearance of hidden objects from Web intelligence report if the class including the object has been renamed in the target universe.
0002654861	Error occurs when refreshing list of values for query filters in a Web Intelligence report after answering the optional prompt for HANA variables
0002654888	"List Of Values undefined not found !" error is shown when clicking on Refresh Values in Prompts window using German Preferred Viewing Locale in Web Intelligence HTML interface
0002655160	Combined queries will be removed from Query Panel after performing a change source action
0002655298	In a newly created Web Intelligence document, the property "reportselected" is missing using the Web Intelligence RESTful service
0002656585	Exporting a report element to PDF with Web Intelligence RESTful Web Service adds extra unwanted margins on the right and at the bottom
0002656658	Incorrect values may be displayed when hovering the mouse cursor over data points on chart with 2 Y-axes in Web Intelligence documents
0002657271	Unexpected values are shown in cells that should be null within Live Office documents migrated from SAP BusinessObjects Enterprise XI 3.1 to SAP BusinessObjects Business Intelligence platform 4.2
0002657670	[CVE-2018-2473] Denial of service (DOS) in Web Intelligence Richclient 3 Tiers Mode
0002658406	Data providers with "refreshable" option not selected should not influence status message when refreshing a document through Web Intelligence RESTful Web Service.

0002659239	In Web Intelligence HTML mode, the report and the Query panel are not updated correctly when removing queries that are missing the universe or connection
0002661364	Retrieve Duplicate Rows option is selected by default and is grayed in a Web Intelligence report based on a BICS connection
0002661886	Detail variable using merged dimensions in a Web Intelligence document with multiple dataprovider returns wrong value
0002662615	Extra comma is generated when exporting a Web Intelligence document as CSV archive file when some of the cells are merged
0002663052	(Java) Save as and then open the report in new window opens the original report
0002663101	In case of Time Dimension, the Navigation Map panel is not updated after doing change level on section in Web Intelligence HTML interface
0002663314	Cannot Fold/Unfold section instance if it is based on Free cells with Web Intelligence HTML viewer
0002664575	Enabling the option 'UseSplitVerifier' in the SAP JVM will generate an Internal Server Error in Web Intelligence RESTful service on Tomcat
0002664747	Error Argument cannot be null. (Error: RWI 00010) (Error: INF) happens when trying to delete one cell inside the crosstab body in Web Intelligence HTML interface
0002664878	"Text" based data providers are always reported being not refreshable by Web Intelligence RESTful Web Service
0002665433	How to disable access to Query As A Web Service Web Services list using http[s]://<server name>:port/dswsbobje/qaawsservices
0002665673	The navigation map panel becomes empty when a section is expanded and after switching to different tabs of the side panel in Web Intelligence HTML interface
0002665754	Refreshable option is checked for non-refreshable queries with prompt in the HTML Web Intelligence interface
0002665812	BI Variants based on SAP Variables, and created in FIORI BI Launch Pad, do not keep the key values.
0002666180	#MULTIVALUE appears in a Web Intelligence document that contains a measure variable with Where() function
0002666522	"repeng_error_en_71" (WIS 00071) error appears when apply a change source of a Web Intelligence document containing merged dimensions
0002667103	[CVE-2018-2472] Cross-Site Scripting (XSS) vulnerability in SAP Web Intelligence DHTML client
0002667338	Refreshable option is checked after duplicating a non-refreshable Web Intelligence query in Web Intelligence
0002667632	Refresh button and menu are not disabled for non-refreshable queries in JAVA Web Intelligence Interface
0002667635	Change the source of a report to a BEx Query containing a mandatory variable cannot be performed using the Web Intelligence RESTful service
0002667798	DPI setting is not taken into account when exporting current report as PDF using Web Intelligence HTML interface
0002667818	Dimension/measure object is still can be seen in the available objects, even the object had been removed from the result object

0002667871	Hidden objects of a Web Intelligence report are visible in Applet mode when we are in navigation paths display
0002670613	Business Intelligence users can access the Free Hand SQL editor in Web Intelligence even when having no rights to it
0002670658	Getting the details of a TXT or CSV based data provider through Web Intelligence RESTful Web Service throws an error after an "undo" action
0002670766	[EMPTY_VALUE] appears for prompt values when rescheduling a Web Intelligence instance
0002671999	Manually enter a dash character in a prompt with between operator is not working as expected in Web Intelligence HTML interface
0002672313	Dashboard creation locale is not used by Document As A Web Service over Web Intelligence RESTful Web Service
0002675801	Changing the data source file of an Excel data provider, formerly based on a local file, throws an error through Web Intelligence RESTful Web Service.
0002677211	Web Intelligence page will hang after click Design button for the second time when customization has been applied
0002677885	"Refresh on open" functionality is not working in some Web Intelligence documents using "element link" feature
0002680213	Erroneous name and type of hierarchical list of values might be returned by Web Intelligence RESTful Web Service.

SAP Crystal Report for Enterprise

SAP Note #	SAP Note Text
0002610594	Chart Data Labels setting not retained in Crystal Reports for Enterprise
0002637964	Error: 'Non supported datatype' when refreshing a report based of MySQL that contains a field of data type: 'Text', in Crystal Reports for Enterprise
0002643005	In MS Edge, unable to view PDF document generated by Crystal Reports for Enterprise
0002645817	Stacked column chart containing negative or numbers close to zero are not displayed correctly in Crystal Reports for Enterprise
0002648815	Warning message not displayed when entering invalid prompt value, for report created in Crystal Reports for Enterprise, based off a BEx Query that uses customer exit variable - BADI
0002657405	Error: 'Invalid value - Index:0, Size:0' when refreshing a report based off a Bex Query in Crystal Reports for Enterprise, and not entering any values for the Optional Variables
0002660947	Crystal Reports for Enterprise document cannot be viewed in BI Launchpad if a data object in the the universe query is filtered using CurrentDate() function
0002675996	Standalone Viewer prompting UI doesn't work
0002678163	In SAP BI Mobile, image display in black after scaling it to a different size in Crystal Reports for Enterprise

SAP Crystal Reports 2013

SAP Note #	SAP Note Text
0002654958	In the CMC, when trying to personalize an existing publication a java.lang.NullPointerException is thrown
0002659022	Error: "Add objects to the folder" rights is required to save the document to folder xxxx" is received while saving a Dashboard to BI Platform.
0002666873	Logon failed when refreshing a report based off an SAP Data Source in Crystal Reports, or list of SAP Systems missing when creating a new report
0002666883	An error occurred, or nothing displays, when using an OpenDocument url with the tag sOutputFormat, to view a report created in Crystal Reports, and not providing all the parameters values in the OpenDocument url
0002674552	"Table not found" error appeared after setting custom database logon for crystal reports with stored procedure to use embedded datadirect odbc driver for SQL Server.

Fixed Issues for SAP BusinessObjects Business Intelligence Suite 4.2 Support Package 06 Patch 02

BI-BIP-DF

SAP Note #	SAP Note Text
0002483304	MSU IDT Error SQL Server 2016 Universe Connection
0002689613	MSU IDT HANA 2.0 Connection Error

BI-RA-AO-BIP

SAP Note #	SAP Note Text
0002679172	Prompt Variants are not available for selection when scheduling Analysis Publications

BI-RA-WBI-CGS

SAP Note #	SAP Note Text
0002686124	When changing source of a Web Intelligence document, a perfect match of objects is considered ambiguous

BI-RA-WBI-FE-FIO

SAP Note #	SAP Note Text
0002637333	An error pops up when using document linking through Web Intelligence Interactive Viewer
0002691867	The error "Error (WSR 00401) : The resource of type "Driller" is already created" is raised when saving the document after exiting Auto Refresh mode if the 'Enable drilling' option is checked

SAP BusinessObjects Analysis, edition for OLAP

SAP Note #	SAP Note Text
0002691080	Analysis for OLAP creates additional user sessions when a workspace is opened

SAP BusinessObjects Business Intelligence platform

SAP Note #	SAP Note Text
0002653432	Fiori BI Launchpad ignores disable.locale.preference setting
0002676449	Return proper error when no SAML provider is found to generate authentication ticket to HANA database
0002678784	Translation for folder is not reflected in Fiori BI Launch Pad
0002679834	'No source document selected' error in Publication properties / SAP Delivered Support
0002689259	[CVE-2019-0268] Missing XML Validation vulnerability in SAP BusinessObjects BI Platform CMC module

SAP BusinessObjects Information Design Tool

SAP Note #	SAP Note Text
0002621444	Changing the SQL for a dimension causes the dimension to lose its associated table
0002627318	IDT Cannot Connect to Amazon Redshift through ODBC
0002645331	Core dumps are generated when running "cscheck ds" or "cscheck find".
0002648687	Universe object is randomly being invisible in the @Prompt Editor window in Universe Design Tool
0002655730	An error "Invalid Calculated Column '<column name>’. Aggregation functions are not supported in a calculated column expression. (Error: INF)" is occurring when refreshing a Web Intelligence document
0002686145	Changes made to derived tables in Core universe are not updating in the Linked universe

SAP BusinessObjects Report Conversion Tool

SAP Note #	SAP Note Text
0002662595	Free-hand SQL based WebI report using Sybase ASE Open Client connection calling Stored Procedure fails with "Not Converted: PDP Stored Procedure Connection" error
0002679800	[4.2 SP05] Unable to refresh RCT converted freehandsql report which contain both @prompt and @variable

SAP BusinessObjects Semantic Layer

SAP Note #	SAP Note Text
0002493833	Error "SAP DBTech JDBC: [2048]: column store error: search table error: [34023] Instantiation of calculation model failed" appears when refreshing a Web Intelligence document based on HANA View multiple entries input parameter
0002594162	HANA TIMESTAMP data type appears as STRING in Web Intelligence while using HANA OLAP connection
0002646139	Using Web Intelligence, an error occurs when displaying a List of values created by using SQL and @DerivedTable function
0002646817	HANA hierarchy sort processing is not applied in Web Intelligence documents
0002651277	Error message when refreshing List of Values against MSAS via kerberos SSO
0002663468	An error is occurring when selecting a value"@prompt" to answer a prompt when running a Web Intelligence report
0002666695	Refreshing the List of Value for HANA Input Parameter/Variable is much slower in Web Intelligence "HANA Online" mode compared to HANA Studio
0002668920	Universe imported into 4.2 SP5 cannot be opened in Information Design Tools
0002679698	Query Script Generation Failed error when using a Data Service Provider created by a custom SDK application
0002686257	"Unexpected Exception" or "Java Heap Space" errors may appear when refreshing a Web Intelligence document based on a BEx query

SAP BusinessObjects Web Intelligence

SAP Note #	SAP Note Text
0002560649	Web Intelligence report created on Excel file does not display the path name in query properties
0002596086	Objects can't be removed at the first try from Results Objects panel in Web Intelligence HTML interface
0002616320	'Can't find value in given data path for key [KEY]' error appears in Web Intelligence when trying to fold/unfold a break
0002621902	'First row contains column names' option works incorrectly in Web Intelligence when building a report top of multiple sheets Excel file
0002626010	#TOREFRESH error occurs in Web Intelligence reports having merged dimensions with details and empty result for database delegated measures
0002626033	Hana ODBC connections are not available while creating a Web Intelligence report based on Free-hand SQL data source
0002626102	A Web Intelligence document based on the execution of a stored procedure thru Free-Hand SQL causes the SQL query to execute twice on the Database Server
0002629755	Exporting a Web Intelligence document in Excel format may take a long time or may never finish

0002631890	“[IllegalArgumentException]" error occurs when refreshing Web Intelligence document
0002646900	Incorrect SQL script generated with the wrong (AND/OR) operator when Query Filter contains a subquery or database ranking filter in Web Intelligence
0002648668	Using Avoid page break in block for breaks in a Web Intelligence report is splitting the table and causing totals to appear on different pages
0002652965	HANA prompt variables order changes each time an object is moved within the Query Panel Result Objects pane in Information Design Tool
0002664229	The prompt text which contains brackets (and) is not correctly encoded in the generated URL by Add Document Link function
0002667090	Input controls disappear from Web Intelligence after saving the document on a Websphere based environment
0002669447	Measure object will return empty values when applying two or more filters on a report cross table with merged dimensions in Web Intelligence
0002672044	An internal error occurred while calling 'processDPCommandsEx' API error is displayed when running query in Web Intelligence
0002674621	Hierarchy node level is collapsed while refreshing a Web Intelligence report with 'no data to retrieve'
0002674709	"An exception occurred in the visualization framework. (Error: RWI 00621) (Error: INF)" error appears when changing the Tick Length of the value Axis Layout in Web Intelligence HTML interface
0002674992	User preferences items are unexpectedly changed in BI Launchpad
0002676387	The Prompts window appears repeatedly when refreshing Web Intelligence documents
0002677388	An Object used in the subquery of universe-based Web Intelligence report is grayed out when trying to change data source to a universe where the property "use as condition" of this object is unchecked
0002677434	Navigating back to a particular report using Navigation Map in Web Intelligence does not return the expected report page in a complex Web Intelligence report with sections and sub-sections
0002678647	The objects in the subquery are lost when moving the filter to a different position in the Web Intelligence Query Panel
0002679041	Error occurs when refreshing the List of Values of HANA Calculation Views in the Web Intelligence HTML interface if both optional and mandatory variables are listed in the Prompts Summary
0002679262	Calendar date picker is not appearing when using the User Prompt Input option in the Web Intelligence HTML viewer
0002679644	Changing the path data source of a Web Intelligence document based on an Excel file generates an error
0002681275	Web Intelligence customizations are not being applied to the Web Intelligence HTML interface
0002683290	"Print" button doesn't work in the Print window of Web Intelligence HTML interface
0002683319	Web Intelligence hangs when opening a large document with hidden columns after upgrading to SAP BusinessObjects Business Intelligence Platform 4.2 SP5 Patch 3

0002684160	Double-clicking in list of values for HANA interval variables in Web Intelligence HTML interface does not add the value to the selected value field
0002685541	Error message may appear when exporting a Web Intelligence report to PDF
0002685818	List of values or context dialog boxes do not appear in Web Intelligence HTML interface
0002686176	@Prompt parameter change from “Constrained” to “Free” at universe level does not get reflected in existing Web Intelligence reports
0002686331	The "List of values" dialog box doesn't show up in Web Intelligence HTML interface when running within SAP NetWeaver Portal and Internet Explorer
0002686887	The last character cannot be fully displayed in a cell if the font is Gothic and the cell is set to Align Right and Italic in Web Intelligence with Internet Explorer
0002687127	WebIntelligenceProcessingServer server crashes with Geo maps enriched with Longitude and Latitude variables using ToDecimal function
0002687483	Cannot edit or create query for a Web Intelligence report with Free-hand SQL data source when the connection name contains Japanese double bytes words

0002625278	PREVIOUS function return wrong result in the break header/footer of the crosstab in Web Intelligence document
0002641029	Where operator with measure condition has no effect on Reference Object of a Web Intelligence report
0002656065	Prompts based on BEx Variables may not be merged even if they have the same data type and use the same prompt text.

0002681667	'Apply security filtering on open' option is not working correctly when opening Web Intelligence report
0002693566	Merged dimensions become unmerged in Web Intelligence documents based on a BEx query (direct BICS)
0002697112	"Invalid SET statement in the triggered action" error message appears when clicking on Run query in Web Intelligence
0002697172	Incorrect object name in Web Intelligence when creating query based on Free hand SQL
0002699174	Issues with title and legend location in chart when formatting Area Display in a Web Intelligence document
0002705294	View script window is getting grayed out for users with advanced security rights
0002706510	The font size in chart may change in Web Intelligence documents migrated to SAP BusinessObjects Business Intelligence Platform 4.2
0002707058	Incorrect value is returned in DatesBetween and TimeBetween function with WeekPeriod
0002711949	Selected object is missing in the "result from another query" filter when merge is applied for Web Intelligence document in HTML Mode
0002714038	Apply a Query level filter on Dimension numeric Object with Operator “In list” or” Not in list” and selecting values from list Getting error message WIS 10703
0002714187	Manually entered prompt values for complex selection variables are not show in the cell with PromptSummary() function after refreshing the report
0002714385	An internal error is thrown by Web Intelligence RESTful Web Service when exporting a Web Intelligence document to ZIP (HTML) with additional ZIP entries
0002715049	Input controls based on a variable incorrectly filter data on another Report tab in Web Intelligence documents
0002716755	Document Structure and Filters panel came to blank after Undo operation to cancel the recent added filter in Web Intelligence HTML interface
0002717586	Warning message "The custom script has been reset" is not displayed when Custom SQL is updated
0002717806	Mozilla Firefox: Unable to create a new custom Palette for a chart in Web Intelligence HTML interface.
0002718449	Can't apply custom sort to a variable which is based on a grouping variable in a Web Intelligence report
0002720541	Failed to parse report element (error: INF) error appears in a Web Intelligence document having a filter on empty hierarchical caption
0002721531	Hardly possible to select the color and opacity when creating a new custom Palette in Web intelligence HTML interface using German language
0002722509	Wrong Week number for Time dimension in WebIntelligence for Fiscal calendar
0002723588	An internal error is thrown by Web Intelligence RESTful Web Service when getting details of a merged expression built on hierarchical expressions.
0002724352	Count() returns wrong values in Web Intelligence document containing multiple dataproviders and merged dimensions
0002724353	Error #MULTIVALUE occurs when using NoFilter() function in Web Intelligence document

0002724693	Empty sections are still visible in Web Intelligence document even if 'Hide section instances when empty' option is checked
0002724741	In Web Intelligence documents with incompatible dimensions in a table, #DATASYNC is not displayed when 'Avoid duplicate row aggregation' option is checked
0002726394	Section properties are not handled correctly when updating specification using the Web Intelligence RESTful service
0002727450	Images in subfolder of the default SAP BusinessObjects Business Intelligence Platform images folder are not displayed by Web Intelligence Interactive Viewer
0002728347	Web Intelligence reports with Hindi fonts are not getting exported properly to PDF format from both Web Intelligence Rich Client as well as BI Launchpad
0002728799	In a Web Intelligence Document, Hierarchy is flattened in the Table while adding a detail object
0002728830	Web Intelligence HTML interface freezes when moving from a query to another which is corrupted
0002728904	Font Tahoma used on a Web Intelligence document is fall backed on Unix, text used in a cell may wrap when it should not
0002728920	Creating a report in a Web Intelligence document through Web Intelligence RESTful Web Service may throw an error if "Track Data Changes" is not enabled
0002729849	Table Borders are missing in Web intelligence document when exported to PDF format
0002729937	mHTML format generated from a Web Intelligence publication fails to open successfully
0002730578	Error occurs with Query Filters in Web Intelligence document based on universe using derived tables with "@Execute(List of Values)" expression
0002730804	Different behaviors for Element function between HTML and Applet mode when editing a Web Intelligence report if right "Reporting - create and edit input controls" is denied
0002731234	In Web Intelligence HTML mode , Query Filter value entered in the 'Type box' of prompt is automatically getting selected while selecting a value from List of Values
0002731660	In Web Intelligence Document, 'Apply changes and close' generate error when trying to create an HANA document with mandatory variable having no default values
0002732223	Line Width cannot be reduced to 0 in Line Chart when creating a Web Intelligence Report using the HTML Interface
0002732747	An alert should not be assigned several times to a cell when using Web Intelligence RESTful Web Service
0002732815	In a large table at the bottom of some pages, some rows are truncated in page mode or when exported the document to PDF
0002733340	Impossible to add an Excel query after selecting "Open in Designer ..." in Web Intelligence Interactive Viewer
0002733408	When scheduling a Web Intelligence document with the delivery rule "the scheduled content contains data", the result is a warning even if there is 1 Row of data in the document
0002734052	Hidden rows are still visible when viewing a Web Intelligence document in Structure only mode
0002734717	In Web Intelligence, the objects list is not filtered when arranged by Data Source in the Create Element Link wizard

0002735378	When updating the specification of a Web Intelligence report using Web Intelligence RESTful Web Service, the returned status is always the same even if the sent specification is different or invalid
----------------------------	--

SAP Crystal Report for Enterprise

SAP Note #	SAP Note Text
0002653006	Incorrect values in Hierarchy field in Crystal for Enterprise report connected to BW 7.5
0002671471	Some 15 digit numeric prompt value converted to scientific notation in Crystal Reports for Enterprise
0002697094	Crystal Reports Error: 'CRSDK00001152' when refreshing a report based off a Bex Query that uses Selection Optional Variable, which is used in a formula or sub-report linked parameter, in Crystal Reports for Enterprise
0002697576	Subfolders are not displaying in the Open Report dialog window in Crystal Reports for Enterprise 4.2 - Support Pack 06
0002715651	Error: 'Crystal Reports has encountered an unexpected error and needs to close. CRSDK00001016' when refreshing a report based off a Universe connecting to a Time Dependent SAP BW Cube
0002730114	Loading UFL lib with invalid APIs wouldn't crash CR4E Designer any more

SAP Crystal Reports 2013

SAP Note #	SAP Note Text
0002708744	Passing an X-SAP-LogonToken using Crystal reports Javascript API creates an additional session.
0002712222	File menu should be disabled when viewing Crystal Reports in Fiorified BI Launchpad
0002717935	Suppress Embedded Field Blank Lines also looks at static text and does not suppress.

Fixed Issues for SAP BusinessObjects Business Intelligence Suite 4.2 Support Package 06 Patch 06

BI-BIP-ACP

SAP Note #	SAP Note Text
0002737599	BI Administrator Cockpit is not displaying data for Document instances for today filter

BI-BIP-LO

SAP Note #	SAP Note Text
0002746776	Data is not retrieved using Live Office with BOE default PVL on Windows German operation system.
0002748002	Publication WebI report doesn't work in Live Office when its instance including Enterprise Recipients.

BI-RA-WBI-FE-FIO

SAP Note #	SAP Note Text
0002730143	Right to Left content orientation of table columns is not working properly in Web Intelligence Interactive Viewer
0002741348	Current prompt answer values are not displayed after clicking the toggle answer page button in Web Intelligence Interactive Viewer
0002741496	Prompt answer cannot be modified for BEx range variable without list of values associated in Web Intelligence Interactive Viewer
0002751523	Hyperlinks do not open when viewing a document using Web Intelligence Interactive Viewer on iOS Safari
