Feature Scope Description for SAP Sports One

© 2025 SAP SE or an SAP affiliate company. All rights reserved.

1 About This Document

This document defines the functional scope of SAP Sports One.

The availability of some features may depend on the platform on which SAP Sports One is running. Check SAP Help Portal for information or ask your SAP representative.

Further restrictions may apply based on your license agreement with SAP. Functions and capabilities described in the documentation of this product may exceed the functional scope of the product to explain integration with other SAP products that must be licensed separately.

Documentation

The following documentation is available for SAP Sports One:

- This feature scope description
- Information for administrators
- Information for end-users

2 Features

SAP Sports One provides digital solutions to help sports clubs and associations run at their best. With tools for each major club department, SAP Sports One assists clubs and associations with planning, communication, capturing information, and data-driven decision-making.

SAP Sports One is a cloud application accessed via web browser. SAP Sports One also includes a collection of supporting mobile apps that help you stay in touch and remain productive while on the go. (The features that are available in the mobile apps are mentioned in the column "Mobile app feature".)

User Management

Feature	Description	Mobile app feature
Create and manage users	Create and manage users for your players and staff members. The user management functionality in SAP Sports One works in combination with SAP's identity provider, the Identity Authentication service, which provides additional user management features.	
Assign roles and permissions	Assign roles and permissions to each user to manage what they can see and do in SAP Sports One.	

Team Management

Feature	Description	Mobile app feature
Create and manage your club or association's teams	Create the teams within your club or association and assign players and staff members to them. You can also keep track of players who are on loan or who have left.	
Profiles for players and staff members	Keep a record of player and staff member information, such as their height and weight, contact details and contract information. Players and staff members can also enter some of the information themselves.	Also possible with the communication app for Apple and Android phones.
Assess and evaluate players	Create player assessments and evaluations using your club or association's standardized criteria to ensure consistent appraisals.	

Feature	Description	Mobile app feature
Important dates	Manage and browse upcoming dates and events for your club or association, such a new season, competitions, matches, and training camps. You can create events manually or import them from a third-party data provider. (A separate contract with the third-party data provider is required.)	
Keep track of your club or association's resources	Enter your club or association's resources, such as training facilities and equipment, so staff members can select them while planning their sessions. You can also enter personal resources such as mobile phones, laptops, and company cars.	
Plan activities	Use activities to plan upcoming events like training camps and qualification games – including time for traveling. You can create dedicated teams and chat rooms for the activities as well as to-do tasks that you can send to people.	
Stay informed about your upcoming schedule	Check your upcoming events, such as training sessions, physio appointments, and matches. You can also add the events to your everyday calendar app. (Integration with most major calendar apps is possible, such as Microsoft Outlook, Google Calendar, and Calendar for Mac OS and iOS. Integration with some calendar apps may be not possible.)	Also possible with the communication app for Apple and Android phones.
Create a useful list of contacts	Add people working internally and externally for your club or association, for example HR staff or facility management, to a contact list.	
Customize the appearance of SAP Sports One	Customize the colors and background images of SAP Sports One to match your club or association's branding.	
Plan your team squad	Use shortlists to help you plan the team squads.	

Scouting

Feature	Description	Mobile app feature
Find new talent	Find new talent by searching for players and staff members that fit your criteria. You can search for player or staff-member attributes such as age, position, and rating and scouting status – as defined by the scouting team. You can create the player and staff member profiles manually or import them from a third-party data provider. (A separate contract with the third-party data provider is required.)	

Feature	Description	Mobile app feature
Analyze players' performances	With hundreds of DFL, Impect, and SkillCorner KPIs* at your fingertips, the advanced statistics feature lets you pick KPIs to analyze players' performances. You can also save your favorite KPIs as a filter so you can use them again. (*The KPIs are only available for football. DFL provides match data for only division one and two. You must have an account Impect and SkillCorner to receive their data.)	Also possible with the scouting app for Apple and Android phones.
Read CoachInside's profiles about coaches	The collaboration with CoachInside lets you browse their editorial content and reports about coaches directly in SAP Sports One. (Ten selected reports are available for free. To see more, a separate contract with CoachInside is required.)	
Jump to Impect's player profiles	Impect provides comprehensive statistics for 1000s of players worldwide. SAP Sports One enables you to navigate directly from a player's profile in SAP Sports One to the player's Impect profile, where you can browse and analyze the player's statistics. (A separate account or contract with Impect is required. Impect may not have a profile for some players.)	
Browse upcoming matches	Browse the list of upcoming matches to find scouting-relevant fixtures. Upcoming matches can be entered manually or provided by a third-party data provider, which requires a separate contract.	Also possible with the scouting app for Apple and Android phones.
Plan scouting opportunities and send scouting requests to the scouts.	After identifying interesting players, you can create a scouting request and send the request to a scout. In the scouting request you can provide information about the players who should be scouted, details about the scouting event, and information about the requirement of an entrance ticket.	Also possible with the scouting app for Apple and Android phones.
Indicate your availability for scouting assignments.	Let your scouting team know on which days you're available.	
Standardize scouting reports	Help the scouting team write reports consistently, which enable easy comparison, by creating report templates and rating scales that the scouts can use.	
Write reports about scouted players, staff membrs, and matches	Enter your impressions about the players and staff members that you're scouting. You can also write reports about the matches to help you and the scouting team contextualize your reports.	Also possible with the scouting app for Apple and Android phones.
Add players and staff members to scouting shortlists	Add interesting players and staff members to your shortlists so you can quickly find your favorites.	Also possible with the scouting app for Apple and Android phones.

Feature	Description	Mobile app feature
Update a player's or staff member's scouting status	Update the scouting status of a player or staff member so you and the scouting team can quickly see if the person is still of interest.	Also possible with the scouting app for Apple and Android phones.
Browse scouting and match reports.	Read the scouting reports you and your scouting team have created.	Also possible with the scouting app for Apple and Android phones.
Present your scouting shortlist	In presentation mode, you can show your colleagues the people you've added to scouting shortlists.	

Training

Feature	Description	Mobile app feature
Standardize training sessions	Standardize training sessions by creating a catalog of exercises and training-session characteristics that coaches can choose from when planning a training session.	
Flexible planning	Plan flexible training sessions for the whole team, groups, and individuals. This includes planning weights for strength exercises per player.	
Export your training plans	Export training plans as a PDF so you can print them out or refer to them from your preferred device.	
Analyze training data	After training you can import data from your players' fitness trackers to analyze their performance. SAP Sports One can also use the data to show you how exhausted players are so you can avoid over-training them in future sessions. You can manually prepare the data for import or you can import the data automatically from the selected supplier of the fitness trackers. (A separate contract with the supplier of fitness trackers is required).	
Create training reports	Create training reports to summarize your team's training activities during a period, like a week or month.	

Fitness

Feature	Description	Mobile app feature
Plan and analyze performance diagnostic tests	Monitor your players' fitness throughout the year by scheduling performance diagnostic tests. After uploading the test data to SAP Sports One via a spreadsheet, you can analyze the data to identify the best performing players and identify both individual and team trends.	
Analyze a player's training load.	Using training and match data, SAP Sports One calculates your players' physical exertion and displays it as a score next to the players' profiles. You can then use the scores to help you plan training and match participation correspondingly to avoid overloading the players.	

Health

Feature	Description	Mobile app feature
Document a player's illnesses and injuries.	Keep track of your players' illnesses and injuries so you have a comprehensive record of their medical history.	Also possible with the medical app for the Apple iPad and iPhone.
Update a player's medical condition and playing availability	Inform the medical team and coaching staff about a player's health and ability to train and play.	Also possible with the medical app for the Apple iPad and iPhone.
Document medical treatments and physio sessions	Keep track of the medical treatments and physio sessions provided to players. You can record treatments as one-off appointments or as part of a longer treatment plan.	Also possible with the medical app for the Apple iPad and iPhone..
Standardize medical records	To standardize how the medical team document a player's medical record, you can import a catalog of illnesses, injuries, preventative actions, and medications that the medical team can select from.	
Review the team's medical events, medications, and treatments.	Generate reports to get an overview of a team's past or present medical events, medications, and treatments.	
Player absence reports	Create player absence reports for the National Anti-Doping Agency (NADA) of Germany. The reports comply with the regulations for NADA Germany and are only available in German.	

Match Analysis

Feature	Description	Mobile app feature
Analyze your team's performance after a match	Use the video analysis tool to study game footage and share noteworthy moments with your team. You can also annotate videos and game footage with drawing tools to highlight learning opportunities. To help with the analysis, you can import match data and game footage from third-party data providers. (A separate contract with the third-party data supplier is required.)	
Prepare for upcoming matches	Create match-preparation projects consisting of interactive lineups of both your team and your upcoming opponents. You can enhance the line-ups with reports about the opposing teams and their players, which can include videos and player statistics. When you're ready, you can share your projects with the team. You can enter the statistics manually or you can imported them from a third-party data provider. (A separate contract with the third-party data supplier is required.)	
Study your opponents	With the shared match-preparation projects available on your Apple iPad, you and your team can study your opponent's strengths and weaknesses. You can make the projects available offline so you always have access to them, wherever you are. Additionally, you can sketch tactics and situations on your Apple iPad and save them with your match-preparation projects.	This functionality is only available in the match preparation app for the Apple iPad. You can also display the projects on a large free-standing touchscreen that you can position in team areas like the locker room. (The touchscreen can be purchased separately.)
Study penalty takers	Study penalty data to identify the patterns and tactics of penalty takers. This feature is only available for soccer. (A separate contract with the third-party data provider is required.)	

Feature	Description	Mobile app feature
Data-driven tactical analysis	Using tracking data from the players and the ball, you can query and analyze the possessions and match events play by play. For example, you can search for all of your opponent's possessions in one or more matches that began with a goal kick and ended with a shot on goal. SAP Sports One can then show you interesting data and insights about the possessions so you can understand your opponent's tactics. The tracking data is provided by a third-party data provider and is only available for soccer teams in the first and second division of the German Bundesliga. (A separate contract with the third-party data provider is required.)	

Data Analytics

Feature	Description	Mobile app feature
Generate holistic data-driven insights	With an additional license for SAP Analytics Cloud, you can analyze your club or association's SAP Sports One data and present the insights in shareable reports. SAP Analytics Cloud lets you analyze data from many areas of club or association, including scouting, player health, training, and matches.	With the SAP Analytics Cloud app for Apple and Android phones you can view mobile-friendly reports.

Questionnaires

Feature	Description	Mobile app feature
Prepare and send questionnaires	Request feedback from players and staff members with questionnaires that offer a wide variety of question types. You can create questionnaires on any topic, for example about the players' health and fitness or their sleep quality. For your convenience, you can schedule when a questionnaire will be sent to the participants, for example each morning or after each training and match.	
Answer questionnaires	Receive and answer questionnaires conveniently.	Also possible with the communication app for Apple and Android phones.

Communication

Feature	Description	Mobile app feature
Create and manage chat rooms	Create and manage chat rooms to suit your club or association's needs. You can create chat rooms for groups of people or private chat rooms for one-to-one communication. Chat room settings include the ability to control whether people can forward or download the media that's shared in a chat room.	
Communicate with players and staff members	Send and receive text messages, voice messages, and media.	Also possible with the communication app for Apple and Android phones.
Stay updated with notifications	Receive notifications about activities and updates happening in SAP Sports One. The notification settings let you decide which notifications you'd like to receive and how attention-grabbing they are. Note, notifications are only available for selected areas. Contact us for more information.	Also possible with the communication app for Apple and Android phones.

Media

Feature	Description	Mobile app feature
Upload, manage, and share media	Upload, manage, and share your club or association's media, including match footage, with the media library. Supported media formats include videos, images, audio, PDFs, and Word and Excel files.	
Tag content to aid discoverability	Tag content in SAP Sports One with keywords to help people search and find content quickly. For example, you can tag match footage with the names of the players in the footage and you can tag training exercises with keywords like "Difficult" and "Group exercise".	Also possible with the scouting app for Apple and Android phones.

Data Security

Feature	Description	Mobile app feature
Data protection and privacy regulations	SAP Sports One fulfills SAP security standards and enables you to comply with EU GDPR regulations. You can: • Create personal data reports in case someone enquires about what personal data is stored about them in SAP Sports One. • Manage data retention policies for personal data. • Manage audit policies and review the data accessed by SAP Sports One users. • Request people to consent to your club or association's Terms of Use before they can use SAP Sports One.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.
The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
