Supply Chain Management Agents

Feature Scope Description

Content

1	Supply Chain Management Agents.	3
2	About This Document.	4
3	Asset Operations.	5
4	Logistics.	6
5	Product Design.	7

1 Supply Chain Management Agents

With the product supply chain management agents, you can delegate specific tasks to specially designed agents that handle multi-step, adaptive workflows, deciding what to do, when, and how based on business context and user intent. This enables faster decision-making, with human-in-the-loop oversight.

The product supply chain management agents supports integration with other products of the Autonomous Enterprise.

2 About This Document

This feature scope description shows you which features are provided with the product supply chain management agents. In addition, it constitutes the product documentation for the product SCM agents, as defined in the General Terms and Conditions for SAP Software ("GTC").

This document may contain information about product features that are currently part of an SAP Early Adopter Care (EAC) program, and are therefore not available to customers outside of this program. Please contact your SAP Account Executive for further information.

Caution

Make sure you have the latest version of this document. You can find the latest version at the following location: https://help.sap.com/autonomous_scm_domain

Licenses

Note that you may need a separate subscription license for certain features. Please contact your SAP Account Executive for further information.

Region Availability

Note that certain features may only be available in specific regions. Please contact your SAP Account Executive for further information.

3 Asset Operations

The following table shows the key areas in which AI supports Asset Operations:

Key Area	Use
Asset Operation Assistance	You can manage your maintenance work through natural-language conversation. Every-day tasks across the maintenance process run with less manual effort, including identifying maintenance needs, accessing relevant asset information, planning the work, and recording what was done.

4 Logistics

The following table shows the key areas in which AI supports Logistics:

Key Area	Use
Support for logistics operations	You can use natural language conversations to monitor and manage logistics operations in real time, detect deviations early, and coordinate corrective actions across relevant agents before delays escalate.

5 Product Design

The following table shows the key areas in which AI supports Product Design:

Key Area	Use
Product design assistance	You can create and maintain product data, manage engineering and production change records, and improve product structures.

Important Disclaimers and Legal Information

Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon  : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
 - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.
 - SAP does not agree or disagree with the content on the linked-to site, nor does SAP warrant the availability and correctness. SAP shall not be liable for any damages caused by the use of such content unless damages have been caused by SAP's gross negligence or willful misconduct.
- Links with the icon  : You are leaving the documentation for that particular SAP product or service and are entering an SAP-hosted Web site. By using such links, you agree that (unless expressly stated otherwise in your agreements with SAP) you may not infer any product claims against SAP based on this information.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
