

SAP Central Business Configuration

We Understand Your Challenges

Managing cloud installations and implementations for different countries or regions and subsidiaries doesn't have to be challenging. Even when implementing business processes across different SAP cloud solutions. This is where SAP Central Business Configuration comes in to streamline your implementations and ongoing operations.

What is SAP Central Business Configuration?

SAP Central Business Configuration is a tool that allows you to configure business processes for SAP S/4HANA Cloud Public Edition, as well as further SAP cloud solutions in future, from a single, central location, based on your specific business needs.

Key Capabilities

SAP Central Business Configuration has been in use by new customers since January 2021 and succeeds the Manage Your Solution app. It provides the following capabilities, all accessible from one central location:

Overview Page

Be guided through your implementations for SAP S/4HANA Cloud Public Edition

Scoping

Define your solution scope by selecting countries and business processes

Org. Structure

Set up and maintain your company's organizational structure

Configuration

Tailor business processes to meet your company's requirements

Key Highlights

- Central configuration of business processes across the Intelligent Enterprise, starting with SAP S/4HANA Cloud Public Edition
- Reduced configuration efforts and more flexibility
- Guidance throughout the implementations and ongoing operations
- Capability to make additions to your scope, organizational structure, and configuration settings directly via the user interface
- Scoping of a predefined bundle with the option to add scenarios on top and selection of multiple countries or regions at once
- Organizational structure setup via a graphical user interface that guides you through the process and allows you to change and delete units up until they're confirmed
- Embedded help for instant context-sensitive user assistance
