

SAP Central Business Configuration | at a Glance

We Understand Your Challenges

Managing cloud installations and implementations for different countries or regions and subsidiaries doesn't have to be challenging; even when implementing business processes across different SAP cloud solutions. This is where SAP Central Business Configuration comes in to streamline your implementation and ongoing operations.

What is SAP Central Business Configuration?

SAP Central Business Configuration allows you to continuously transform your business using SAP's cloud portfolio, while securing both the business and configuration lifecycle.

Key Capabilities

SAP Central Business Configuration provides the following capabilities, all accessible from one central location:

Overview Page

Be **guided** through your SAP cloud implementations.

Scoping

Define your **solution scope** by selecting countries/regions, languages, and business processes.

Organizational Structure

Set up and maintain your company's **organizational structure**.

Configuration

Tailor **business processes** to meet your company's requirements.

Key Highlights

- **Central configuration** of business processes across SAP's cloud portfolio, starting with SAP S/4HANA Cloud Public Edition
- Reduced **configuration** efforts and more **flexibility**
- **Guidance** throughout the implementation and ongoing operations
- Capability to make **additions** to your scope, organizational structure, and configuration settings directly via the user interface
- Scoping of a **predefined bundle** with the option to **add scenarios** on top, including the possibility to select multiple countries or regions at once
- **Organizational structure setup** via a graphical user interface that guides you through the process and allows you to **change and delete** units up until they're confirmed
- **Embedded help** for instant context-sensitive user assistance
